

LIST OF FIGURES

LIST OF FIGURES

Figure No	Particulars	Page No
1	Master plan of cuttack showing wastewater outfall points in river Mahanadi and Kathajori	38
2	Layout plan for design of Aquaculture-based Sewage Treatment Plant (ASTP), Matagajpur, Cuttack	39
3	Acute toxicity values and mortality of <i>Cirrhinus mrigala</i> at different exposure period in sewage	62
4	Precipitation levels at ASTP (relative humidity, rainfall and temperature) Matagajpur, Cuttack	64
5	Variations in dissolved oxygen, biochemical oxygen demand (BOD ₅) and chemical oxygen demand (COD) of water at aquaculture-based treatment system	68
6	Variations in pH and total alkalinity levels of water at aquaculture-based treatment system	71
7	Variations in total hardness and chloride contents of water at aquaculture-based treatment system	77
8	Variations in ammonium-N, nitrite-N and nitrate-N contents of water at aquaculture-based treatment system	80
9	Variations in phosphate-P and dissolved organic matter of water at aquaculture-based treatment system	88
10	Variations in pH of sludge at aquaculture-based treatment system	101
11	Variations in specific conductivity of sludge aquaculture-based treatment system	103
12	Variations in organic carbon of sludge at aquaculture-based treatment system	105
13	Variations in total nitrogen of sludge at aquaculture-based treatment system	108
14	Variations in available phosphorus of sludge at aquaculture-based treatment system	110
15	Variations in mean plankton count and percentage composition values of phytoplankton and zooplankton at aquaculture-based treatment system	113
16	Variations in phytoplankton groups at aquaculture-based treatment system	117

Figure No	Particulars	Page No
17	Variations in zooplankton groups at aquaculture-based treatment system	120
18	Variations in aerobic heterotrophic bacterial counts of water and sludge media at aquaculture-based treatment system	125
19	Variations in total coliform bacterial counts of water and sludge media at aquaculture-based treatment system	130
20	Variations in faecal coliform bacterial counts of water and sludge media at aquaculture-based treatment system	135
21	Variations in faecal streptococci bacterial counts of water and sludge media at aquaculture-based treatment system	140
22	Variations in <i>Salmonella</i> counts of water and sludge media at aquaculture-based treatment system	144
23	Variations in aerobic nitrogen fixing bacterial counts of water and sludge media at aquaculture-based treatment system	149
24	Variations in nitrifying-I bacterial counts of water and sludge media at aquaculture-based treatment system	154
25	Variations in nitrifying-II bacterial counts of water and sludge media at aquaculture-based treatment system	158
26	Variations in denitrifying bacterial counts of water and sludge media at aquaculture-based treatment system	163
27	Variations in amyolytic bacterial counts of water and sludge media at aquaculture-based treatment system	167
28	Variations in aerobic cellulolytic bacterial counts of water and sludge media at aquaculture-based treatment system	172
29	Variations in inorganic phosphorus-solubilising bacterial counts of water and sludge media at aquaculture-based treatment system	176
30	Incidence of aerobic heterotrophic bacteria (CFUs $\times 10^3/g$) in organs of silver carp, catla, rohu and mrigal during the culture period at ASTP	183
31	Incidence of total coliform bacteria (CFUs $\times 10^3/g$) in organs of silver carp, catla, rohu and mrigal during the culture period at aquaculture-based sewage treatment system	184
32	Incidence of faecal coliform bacteria (CFUs $\times 10^3/g$) in organs of silver carp, catla, rohu and mrigal during the culture period at aquaculture-based sewage treatment system	185

Figure No	Particulars	Page No
33	Incidence of faecal streptococci (CFUs $\times 10^3$ /g) in organs of silver carp, catla, rohu and mrigal during the culture period at aquaculture-based sewage treatment system	186
34	Incidence of <i>Salmonella</i> (CFUs $\times 10^3$ /g) in organs of silver carp, catla, rohu and mrigal during the culture period at aquaculture-based sewage treatment system	187
