Chapter I: Some Fundamental Function Spaces Forming the Basis of the Theory of Generalized Functions 1-22

1.1 Introduction 1
1.2 The Banach Space $C(X)$ 1
1.3 The Frechet Space $C(\ )$ 3
1.4 The Frechet Space $C^\infty(\Omega)$ 5
1.5 The Function Spaces $C_c(X), C_o(X), D_K(\Omega)$ 6
1.6 The Banach spaces $L^p(\ )$ 8
1.7 Testing Function Space $D(\Omega)$ 17
1.8 The Space of Rapidly Decreasing Functions 20

Chapter II: Distributions and Their Fundamental Properties 23-54

2.1 Distributions And Generalized Functions 23
2.2 Distribution Spaces $D'(\ )$ 25
2.3 Equality of Distributions 27
2.4 Support of A Distribution 29
2.5 Some Operations on Distributions 31
2.6 Multiplication of Distributions 34
2.7 Convergence in the Space $D'(\Omega)$ 38
2.8 Differentiation of Distributions 45
2.9 Tempered Distributions 50
### Chapter III: Generalized Legendre Transformation and Convolution Theorem  55-72

3.1 Introduction  55  
3.2 Preliminaries  55  
3.3 The Generalized Legendre Transformation  64  
3.4 Convolution  69  

### Chapter IV: Generalized Laguerre Transform and Its Properties  73-110

4.1 Introduction  73  
4.2 Laguerre Polynomial  73  
4.3 Laguerre Transformation  86  
4.4 Generalized Laguerre Transforms  92  
4.4.1 Testing Function Space \( A'(L_n^{(a)}) \)  95  
4.4.2 Space of Laguerre Transformable Generalized Function \( A'(L_n^{(a)}) \)  99  
4.4.3 Convolution of Laguerre Transformable Generalized Functions  103  
4.5. A Note on an Integral Involving Laguerre Polynomial  107  
4.5.1 Preliminary Results  107  
4.5.2 Proof of the formula (4.5.1)  109  
4.5.3 Remarks  110  

### Chapter V: Fractional Calculus of Generalized Functions  111-136

5.1 Introduction  111  
5.2 Fundamental Definitions  112  
5.2.1 Fractional Derivative with Respect to An Arbitrary Function  118
5.2.2 Fractional Partial Derivative 119

5.3 Properties and Generalizations of Riemann-Liouville and Weyl Fractional Integral Operators. 120

5.4 The Okikiolu and Riesz Fractional Integral Operators 128

5.5 Fractional Integrals of Generalized Functions 130

5.5.1 Schwartz’s Spaces $\mathcal{D}_l^p$ and $(\mathcal{D}_l^p)'$ 130

5.5.2 McBride Spaces, $F_{p,\mu}$ and $F'_{p,\mu}$ 132

5.5.3 Fractional Integrals and Fractional Derivatives on the Space $D'$ 135

**Chapter VI: Dual Series Equations Involving Generalized functions** 137-154

6.1 Introduction 137

6.2 Dual Series Equations 137

6.3 Appearance of Dual Series Equations 138

6.4 Special Sets of Dual Series Equations 140

6.5 On Dual Laguerrre Series of Generalized Functions 145

6.5.1 Introduction 145

6.5.2 The Results Used in the Analysis 148

6.5.3 Problem (a) 150

6.5.4 Problem (b) 152

**Bibliography** 155-171
