

CONTENTS

CHAPTER 1		
INTRODUCTION		1
1.1	Polymer blends	2
1.2	Blending techniques	3
1.3	Miscibility of blends	4
1.4	Characterisation of polymer blends	5
	1.4.1 <i>Microscopy</i>	5
	1.4.2 <i>Glass transition temperature</i>	10
	1.4.3 <i>Scattering methods</i>	17
	1.4.4 <i>Spectroscopic techniques</i>	18
	1.4.5 <i>Viscometric technique</i>	21
	1.4.6 <i>Rheological measurements</i>	23
1.5	Studies on elastomer blends	23
1.6	Scope and objectives of the work	24
1.7	References	38
CHAPTER 2		
MATERIALS AND EXPERIMENTAL TECHNIQUES		43
2.1	Materials	44
	2.1.1 <i>Acrylonitrile butadiene rubber (NBR)</i>	44
	2.1.2 <i>Poly(ethylene-co-vinyl acetate) (EVA)</i>	45
	2.1.3 <i>Chemicals</i>	45
	2.1.4 <i>Fillers and solvents</i>	45
2.2	Preparation of the blends	45
2.3	Characterisation of the blends	47
	2.3.1 <i>Mechanical properties</i>	47
	2.3.2 <i>Optical microscopic studies</i>	48
	2.3.3 <i>Scanning electron microscopic (SEM) studies</i>	48
	2.3.4 <i>X-ray studies</i>	49
	2.3.5 <i>Cure characteristics</i>	49
	2.3.6 <i>Polysulphidic linkage estimation</i>	49
	2.3.7 <i>Crosslink density determination</i>	50
	2.3.8 <i>Melt flow studies</i>	51
	2.3.9 <i>Dynamic mechanical analysis</i>	53
	2.3.10 <i>Diffusion experiments</i>	54
	2.3.11 <i>Thermal analyses</i>	54
2.4	References	
CHAPTER 3		
MORPHOLOGY AND MECHANICAL PROPERTIES OF NBR/EVA BLENDS		56
3.1	Results and discussion	58
	3.1.1 <i>Morphology of the blends</i>	58
	3.1.2 <i>Mechanical properties</i>	62
	3.1.3 <i>Model fitting</i>	69
	3.1.4 <i>Reprocessability of the blends</i>	72
3.2	References	74

CHAPTER 4		
CURE CHARACTERISTICS AND MECHANICAL BEHAVIOUR OF UNFILLED AND FILLED NBR/EVA BLENDS		76
4.1	Results and discussion	78
4.1.1	<i>Morphology</i>	78
4.1.2	<i>Cure characteristics</i>	80
4.1.3	<i>Mechanical properties</i>	82
4.1.4	<i>Scanning electron microscopic studies</i>	92
4.1.5	<i>Model fitting</i>	94
4.1.6	<i>Effect of fillers</i>	95
4.2	References	106
CHAPTER 5		
MELT RHEOLOGICAL BEHAVIOUR OF NBR/EVA BLENDS		107
5.1	Results and discussion	109
5.1.1	<i>Melt viscosity</i>	109
5.1.2	<i>Melt elasticity</i>	113
5.1.3	<i>Die swell</i>	116
5.1.4	<i>Extrudate deformation</i>	117
5.1.5	<i>Morphology of the extrudates</i>	118
5.2	References	122
CHAPTER 6		
DYNAMIC MECHANICAL ANALYSIS OF NBR/EVA BLENDS		124
6.1	Results and discussion	127
6.1.1	<i>Effect of blend composition</i>	127
6.1.2	<i>Effect of frequency</i>	134
6.1.3	<i>Effect of crosslinking systems</i>	141
6.1.4	<i>Model fitting</i>	144
6.1.5	<i>Cole-Cole analysis</i>	145
6.1.6	<i>Time-temperature superposition analysis</i>	146
6.2	References	148
CHAPTER 7		
TRANSPORT PROPERTIES OF NBR/EVA BLENDS		149
7.1	Results and discussion	152
7.1.1	<i>Sorption behaviour</i>	152
7.1.2	<i>Determination of the network structure</i>	169
7.1.3	<i>Comparison with theory</i>	170
7.1.4	<i>Effect of penetrants</i>	171
7.2	References	177
CHAPTER 8		
THERMAL ANALYSIS AND AGEING CHARACTERISTICS OF NBR/EVA BLENDS		180
8.1	Results and discussion	183
8.1.1	<i>Thermogravimetric analysis</i>	183
8.1.2	<i>Differential scanning calorimetry</i>	197
8.1.3	<i>Ageing characteristics</i>	199
8.2	References	207
CONCLUSION		208
FUTURE OUTLOOK		214
APPENDIX		217
