Chapter - IV
SHGs and Its Members
SHGs and Its Members

INTRODUCTION

In this chapter I will give elaborate description of 47 SHGs and its members, their age, sex, literacy rate, occupational activities and marital status.

Out of the four villages in Birbhum district I carried on a study on 47 SHGs having different ethnic characters. Going as per field study, I observed that out of all 19 SHGs were formed by Castes, 7 SHGs were by Tribes and 21 SHGs were by Muslims. Nature of SHGs turned out to be primarily homogeneous based on caste and community. When a SHG, be it formed by Caste members, Muslim community or Tribal, happened to be homogeneous, sustainable with the composition of their own caste, community and character, leaving and exception of the Muslim and Caste members forming a group and acting accordingly. Similar heterogeneity was common in SHGs formed by Caste groups and Tribal groups. It was 6.66% groups were formed by Caste and Muslim. Considering religious heterogeneity, 22.8% of the total SHGs featured to be mixed ethnic in nature, found in the villages of Ballavpurdanga, Kajipara and Mirepara. Groups involving homogenous members in relation to caste and community process individualistic articulation in production and marketing. Hereby, I would like to describe all individual groups and its members based on their age, sex, literacy rate, marital status and occupation respectively.

Out of total 47 SHGs I studied through in four villages of Birbhum district, I observed 4 female Tribal groups but could not find a single male Tribal group. I observed 4 were male and 9 were female, male Muslim groups, which were totals 13 Muslim groups.

From the above observation table (5.1) I observed that out to total 18 Caste SHGs were the presences of only male Caste group, whereas there are 17 female Caste groups.

In the above table I observed out of 9 total heterogeneous groups existence of only one male and 8 female heterogeneous group.

Now, if I focus on a observation of Tribal and Muslim, Tribal and Castes, Tribal, Muslim and Caste groups respectively, there was a common feature of non -existence of male group, but presence of minimum female group in each of the above mentioned categories.

As I told earlier that this guideline of new SHG as proposed by NABARD, basically two stages are involved, like (i) Pre -group formation stage and (ii) Promotion stage. The second stage, which is involves four stages like forming, storming, norming and performing.

According to NABARD guideline, I observed in the Tribal village, that male groups failed to exceed the two promotion stages after forming and storming stages, they were dropped out.

Other than all these, it is to mention that in case of SHGs prevalence of mostly female groups is observed, with meager participation of male groups. Out of 47 SHGs only 6 SHGs were male (12.77% of total group) and 41 (87.23% of total group) SHGs were female.

In Ballavpurdanga 7 SHGs formed by women. The groups were Rajashri, Prakriti, Sidhukanu, Ipil Gauta, Jaherera, Manashi and Natunpalli Swanirbhardal. In the following paragraphs the details of SHGs and its
members described will vividly describe. The process of formation revolved around the stages of storming, norming, forming and performing.
