Acknowledgement

Preeminent, I believe myself fortunate enough to have Dr. Trupti Ranjan Mahapatra as a supervisor. I would like to thank him for his invaluable guidance, continuous encouragement and thoughtfulness towards the accomplishment of my Ph.D. work. It has been my contentment to have him as a guide, exemplar, friend and mentor. His suggestions and advice have been a precious teaching for my work and my life. I will admire his indispensable help for the rest of my life.

I am also highly indebted to Dr. Subrata Kumar Panda, NIT, Rourkela, for his well-directed guidance as my co-supervisor and more importantly for placing his trust and belief in my capability for undertaking this work. I owe him a lot for his incessant support, motivation and visionary teachings.

I would also like to take this opportunity to thank the members of the Research Scrutiny Committee Prof. Sushanta Tripathy and Prof. S. Satapathy of School of Mechanical Engineering, KIIT for their valuable suggestions during the progress of this work.

It is my duty to record my sincere thanks and heartfelt gratitude to Prof. A. K. Sahoo, Dean, School of Mechanical Engineering, KIIT, Bhubaneswar, for support, encouragement and blessings during the course of this work.

I wish to express my thankfulness to Prof. B. C. Routara, Programme Head (Ph.D.) for his invaluable support, comments and thoughtfulness throughout the dissertation work.

I am very much thankful to Dr. Vishesh Ranjan Kar, Assistant Professor, Department of Mechanical Engineering, NIT, Jamshedpur, India for providing access to and technical expertise for using LMS Virtual.Lab software. Without his help, the work would have been difficult to realize.

A special thanks to my friends Mr. Chetan Kumar Hirwani, Mr. Pankaj Katariya and Mr. Kulmani Mehar from NIT, Rourkela not only for their understanding, patience
and extending helping hand during the intricate stages of formulation and performing the experiments, but also for accommodating and facilitating me during my visits and stays at NIT, Rourkela. I heartily believe that the accomplishment of this work would not have been possible without their friendly support.

I am very much thankful to my colleagues from School of Mechanical Engineering for providing me all necessary assistance in the form of computing facility for research as well as guidance.

I dedicate this thesis, with love and appreciation to my mother, father, and younger sisters, for their unconditional love, unwavering support and understanding; without which I certainly would never have been able to complete this journey.

Above all, I would like to thank the almighty for his continued blessings that have helped me to complete this work successfully.

School of Mechanical Engineering, KIIT
Bhubaneswar- 751024, India
