

# Contents

<b>1</b>	<b>Exotic nuclei</b>	<b>1</b>
1.0.1	Exotic nuclei . . . . .	2
1.0.2	The proton and neutron drip-lines . . . . .	3
1.0.3	Features of exotic nuclei . . . . .	4
1.0.4	Problem for the present work . . . . .	6
<b>2</b>	<b>Shell model and techniques of calculation</b>	<b>9</b>
2.1	The Nuclear Shell Model . . . . .	10
2.1.1	The Nuclear mean field . . . . .	10
2.1.2	Microscopic mean field . . . . .	12
2.2	Effective interactions . . . . .	13
2.2.1	Microscopic effective interactions . . . . .	13
2.2.2	Phenomenological effective interactions . . . . .	14
2.2.3	Schematic effective interactions . . . . .	14
2.3	Configuration mixing . . . . .	15
2.3.1	For two particles outside the closed core . . . . .	15
2.3.2	For three or more particles out side the core . . . . .	17
2.3.3	Coefficient of Fractional Percentage (C.F.P.) . . . . .	17
2.3.4	m-scheme . . . . .	18
2.4	Towards the future of nuclear shell model . . . . .	20
2.5	Techniques of calculation and shell model codes . . . . .	21
2.6	Shell model code: Nushell . . . . .	21
2.6.1	Sequence of programs for energies . . . . .	21
2.6.2	Sequence of programs for overlaps and transitions . . . . .	22
2.6.3	Other programs . . . . .	22
2.7	Diagonalization via LANCZOS method . . . . .	23
2.8	The treatment of giant matrices . . . . .	24
2.9	The m-scheme code ANTOINE . . . . .	24
2.10	The coupled-scheme code NATHAN . . . . .	26

<b>3</b>	<b>Shell model study of neutron rich Oxygen and fluorine isotopes</b>	<b>28</b>
3.1	Introduction . . . . .	28
3.2	Choice of configuration space . . . . .	29
3.3	Differnt types of N-N interaction . . . . .	29
3.3.1	Preedom Wildenthal (PW) Interaction: . . . . .	29
3.3.2	Wildenthal-Mcgrory modified surface delta interaction: . . . . .	29
3.3.3	SDPOTA interacion: . . . . .	30
3.3.4	Renormalised Kuo interaction: . . . . .	30
3.4	Electromagnetic Transition in Nuclei . . . . .	31
3.5	Nuclear Electric Quadrupole Moment . . . . .	31
3.6	Results and Discussion . . . . .	32
3.6.1	The energy levels . . . . .	32
3.6.2	Electromagnetic properties . . . . .	33
3.7	Monopole shift in odd neutron-rich F isotopes . . . . .	34
3.8	Theoretical formalism . . . . .	35
3.8.1	Monopole shift . . . . .	35
3.8.2	Interaction . . . . .	36
3.9	Results and Discussions . . . . .	36
3.10	Conclusions . . . . .	37
<b>4</b>	<b>Large scale shell model calculations for <math>^{61-66}\text{Fe}</math> isotopes</b>	<b>47</b>
4.1	Introduction . . . . .	47
4.2	Details of Calculation . . . . .	48
4.2.1	Configuration space . . . . .	48
4.2.2	Effective Interaction . . . . .	49
4.2.3	Computer code . . . . .	49
4.3	Results and discussions for even-even $^{62-66}\text{Fe}$ isotopes . . . . .	51
4.3.1	Excitation energies and comparison with the data . . . . .	51
4.3.2	Wave functions . . . . .	51
4.3.3	Electromagnetic properties . . . . .	51
4.4	Results and discussions for even-odd $^{61-65}\text{Fe}$ isotopes . . . . .	54
4.5	Results and discussions . . . . .	54
4.6	Conclusions . . . . .	58
<b>5</b>	<b>Large scale shell model calculations for odd-odd <math>^{58-62}\text{Mn}</math> isotopes</b>	<b>59</b>
5.1	Introduction . . . . .	59
5.2	Details of calculation . . . . .	60
5.3	Results and discussions . . . . .	62

5.4	Conclusions . . . . .	66
<b>6</b>	<b>Large scale shell model calculations in Ni region : <math>^{56}\text{Ni}</math> as a core</b>	<b>69</b>
6.1	Introduction . . . . .	69
6.2	Model space and interaction . . . . .	71
6.3	Low lying energy levels of $^{69-79}\text{Cu}$ . . . . .	72
6.4	Low lying energy levels of $^{68-76}\text{Ni}$ . . . . .	73
6.5	Low lying energy levels of $^{70-80}\text{Zn}$ . . . . .	74
6.6	The B(E2) systematics in the Ni isotopes . . . . .	76
6.7	The B(E2) systematics in the Zn isotopes . . . . .	77
6.8	The occupation numbers . . . . .	78
6.9	Conclusions . . . . .	79
<b>7</b>	<b>Large scale shell model calculations in Ni region: <math>^{40}\text{Ca}</math> as a core</b>	<b>82</b>
7.1	Model space . . . . .	82
7.2	Effective Interaction . . . . .	83
7.3	Monopole correction . . . . .	84
7.4	State of the art in the calculations . . . . .	84
7.5	Results and Discussions . . . . .	86
7.5.1	Copper isotopes . . . . .	86
7.5.2	Nickel isotopes . . . . .	88
7.5.3	Zinc isotopes . . . . .	89
7.5.4	The B(E2) systematics in the copper isotopes . . . . .	90
7.5.5	The B(E2) systematics in the nickel isotopes . . . . .	90
7.5.6	The B(E2) systematics in the zinc isotopes . . . . .	92
7.6	Conclusion . . . . .	93
<b>8</b>	<b>Conclusions and Future Prospects</b>	<b>98</b>
8.1	Conclusions . . . . .	98
8.2	Future Prospects . . . . .	100
	<b>Appendix</b>	<b>102</b>
	<b>Publications</b>	<b>103</b>
	<b>Bibliography</b>	<b>106</b>
