ACKNOWLEDGEMENT

The author expresses his profuse gratitude to Dr. D. JAYAKUMAR, Professor and Head, Department of Geology, Madras University P.G. Extension Centre, Salem-11 for showing utmost care and concern to him, especially in his academic pursuit. The author thanks him for his constructive criticism and constant encouragement throughout the course of the research work.

The author is indebted to all the investigators referred to in the text as well as those who have granted permission to use their material.

The author wishes to thank Mr. R. Chandrasekaran, University Research Fellow and Mr. S. Thirumurthi, Research Scholar of this department for the help rendered by them during the research work.

The author wishes to thank his fellow researchers Mr. C. Anandha Prakash and Mr. G. Nanthakumar of this department for their co-operation.

Special mention is due to Mr. C. Boobalan, Research Scholar for his valuable help during the preparation of this dissertation.
His sincere thank to Mr. R. S. Ilangovan for typing the manuscript and M/s. Bharat Power Press, Salem-1 for their neat electronic typing.

Finally, the author would like to thank his family members who have been an unfailing source of encouragement and support throughout the process of preparing the dissertation.
