Acknowledgments

First and foremost I will thank Almighty GOD, the compassionate, the almighty Merciful, who kindly helped me to complete my thesis.

The success of this thesis is attributed to the extensive support and assistance from my supervisor, Prof. Manjit Inder Singh Saggoo. I would like to express my grateful gratitude and sincere appreciation to him for his guidance, valuable advise, supervision, encouragement and kindness to me throughout this study. He’s been a father figure to me and had never made me feel that my father is not with me by providing me the advices at times. Very special thanks to Mrs. Saggoo for her friendship, sanity, good times and love.

I am indebted to Dr. R. C. Gupta, Head of the Department of Botany, Punjabi University, Patiala, for his kind support and help in my work.

I am extremely grateful to all the worthy faculty members of department of Botany, Punjabi University, Patiala for their helpful attitude and constant support, specially from Prof. N. S. Attri and Dr. Geetika Sirhindi.

I wish to thank specially, Dr. Arneet Grewal for her kindness in examining the research work and providing suggestions for improvement and encouragement during my time here and for her patience in teaching me all things synchrotron and round the clock beamline support.

My special thanks are given to Dr. Praveen Chhuneja, Department of Biotechnology and Prof. R. K. Gupta, Soils Department, Punjab Agricultural University, Ludhiana for their encouragement and help in completion of my study.

The acknowledgement would be incomplete if I do not express my gratitude to the nonteaching staff of the department for providing me the help during this course of study.
I would like to thank my labmates for their cheerful cooperation, encouragement, help and support and enjoyment during the course of my study, Ms. Lovleen, Ms. Raman, Ms. Ravneet, Mr. Devinder, Mr. Umer and Ms. Rupinder.

My sincere thanks to Mr. Vikas and Ms. Rajdeep from Department of Zoology, Punjabi University, Patiala, for their inputs and perspective in my thesis work.

I am grateful for the assistance and support of many over the course of my PhD, and regret that I cannot thank you all by name, being constrained to a specific page limit. I am confident you all know who you are, and I offer you my heartfelt thanks. I place here, for posterity, a few names of people who have been with me through the entire process, and were instrumental in my completion of this degree: Inderdeep, Lovleen, Anu Singla, Kulwinder Jassi, Yaad, Sonia and Pooja.

This thesis is dedicated to my family; my father Mr. Gurdev Singh Dhir, I hope and wish Daddy you will be happy wherever you are to see me accomplish your dream and be showering blessing upon me and be there always as the driving force and positive energy during the entire period of my study. “I miss u Daddy” and my mother Mrs. Kulwant Kaur Dhir, my brother Dr. Jasdeep, my bhabhi, Dr. Navdeep and my little nephew Binadeep, who have been an inspiration and have provided constant support in everything I choose to do and guidance throughout. I thank them to have believed in my ability and supported me in my study. I would like to thank all my relatives and friends. Last but not the least, I would like to thank Mr. Devinder Singh Dhir and his family members specially little kids Ravneet and Rattan for their love, motivation and support when much needed.

Kirandeep Kaur Dhir
