CHAPTER III - CHARNOCKITE-GNEISS RELATION -
A PRELUDE

3.1 Introduction 25
3.2 Transition zone 26
3.3 Charnockitisation 28
3.4 Prograde and Retrograde charnockites 30
3.5 Charnockite-gneiss relation in the Study Area 31
3.6 Discussion 32

CHAPTER IV - GEOLOGY OF THE STUDY AREA

4.1 Introduction 35
4.2 Khondalite-charnockite supergroup 36
4.2.1 Lithological Assemblage of Khondalite group (after Gopalakrishnan et al 1975) 36
4.2.2 Charnockite group - Lithological units 36
4.3 Sathyamangalam Supergroup (equal to Sargur Supergroup) 37
4.3.1 Sathyamangalam Belt 39
4.3.2 Lithology of Sathyamangalam 39
4.3.3 Grade of Metamorphism 40
4.3.4 Structural Pattern 41
4.4 Bargur group (equal to Dharwar group) 41
4.4.1 Lithology 41
4.4.2 Metamorphism 42
4.5 Petrology and Mineralogy of the rocks of the Study Area.  

4.5.1 Basement Gneisses  
4.5.2 Charnockite + Garnet  
4.5.3 Pyroxenite  
4.5.4 Pyroxene Granulite + Garnet  
4.5.5 Banded Magnetite-Quartzite  
4.5.6 Quartzo-feldspathic Gneiss  
4.5.7 Retrogressed Gneisses  
4.5.8 Dolerite Dykes  
4.5.9 Granitic Intrusives  
4.6 Tectano-stratigraphy  
4.6.1 Tectano-stratigraphy of the Study Area  

CHAPTER V - STRUCTURAL PATTERN OF THE STUDY AREA  

5.1 Introduction  
5.2 Early Work on Structure  
5.2.1 Narayanaswami (1975)  
5.2.2 Grady (1971)  
5.2.3 Srinivasan (1974)  
5.2.4 Katz (1978)  
5.2.4.1 Mobile belt tectonics  
5.2.4.2 Salem sub-belt  
5.2.5 Sugavanam et al (1976, 1978)  
5.2.6 Subramaniam et al (1979)
5.2.7 Drury et al (1980, 1984)  
5.2.8 Jayakumar et al (1983)  
5.2.9 Mishra (1988)  
5.2.10 Reddi et al (1988)  
5.2.11 Gopalakrishnan et al (1990)  
5.3 Lineaments  
5.4 Structural Pattern observed in the Study Area  
5.4.1 Folds Pattern  
5.4.2 Joints  
5.4.3 Foliation / Banding  
5.4.4 Shears  
5.4.5 Fractures  

CHAPTER VI - SUMMARY AND CONCLUSION  

BIBLIOGRAPHY
