

List of Tables

		Page. No.
Table 3.1	Characterization table of substituted thioureas (7a-u)	64
Table 3.2	Characterization table of bithiazole derivatives (8a-u)	92
Table 4.1	Characterization table of monothiazole derivatives (15a-o)	129
Table 4.2	Characterization table of bithiazole derivatives (19a-u)	145
Table 4.3	Characterization table of the compounds (25a-u)	161
Table 5.1	Antibacterial activity of bithiazole derivatives (8a-u)	186
Table 5.2	Antifungal activity of bithiazole derivatives (8a-u)	187
Table 5.3	Antibacterial activity of mono thiazole derivatives (15a-o)	189
Table 5.4	Antifungal activity of mono thiazole derivatives (15a-o)	190
Table 5.5	Antibacterial activity of pyridyl bithiazole derivatives (19a-u)	192
Table 5.6	Antifungal activity of pyridyl bithiazole derivatives (19a-u)	193
Table 5.7	Antibacterial activity of bithiazole derivatives (25a-u)	195
Table 5.8	Antifungal activity of derivatives (25a-u)	196
Table 5.9	Cytotoxicity assay of bithiazole derivatives (8a-u) in 24hrs	201
Table 5.10	Cytotoxicity assay of bithiazole derivatives (8a-u) in 48hrs	202
Table 5.11	Cytotoxicity study of pyridine based compounds (15b-25u) in 24 hrs	205
Table 5.12	Cytotoxicity study of pyridine based compounds (15b-25u) in 48 hrs	206
Table 6.1	Table of precursors of (8a-u), (15a-o), (19a-u) and (25a-u)	212
Table 6.2	Table of antibacterial activity of potent and good active compounds	213
Table 6.3	Table of antifungal activity of potent and good active compounds	215

List of Figures

	Page. No.
Figure: 5.2.1 Mechanism of MTT assay	198
Figure: 5.2.2 Cytotoxicity inhibition of (8f, 8l, 8r, 8t, 8u) at 48 hrs	203
Figure: 5.2.3 Cytotoxicity inhibition of (8u) at 48 hrs	204
Figure: 5.2.4 Cytotoxicity inhibition of (15b, 15d, 15e, 15m, 15n) at 24 hrs	207
Figure: 5.2.5 Cytotoxicity inhibition of (15b, 15d, 15e, 15m, 15n) at 48 hrs	207
Figure: 5.2.6 Cytotoxicity inhibition of (19i, 19k, 19q, 19r, 19u) at 24 hrs	208
Figure: 5.2.7 Cytotoxicity inhibition of (19i, 19k, 19q, 19r, 19u) at 48 hrs	208
Figure: 5.2.8 Cytotoxicity inhibition of (25i, 25k, 25o, 25q, 25u) at 24 hrs	209
Figure: 5.2.9 Cytotoxicity inhibition of (25i, 25k, 25o, 25q, 25u) at 48 hrs
