# TABLE OF CONTENTS

1. Introduction  .............................................. 1

2. Literature Review  .................................. 4
   2.1 Chikungunya  ........................................ 4
   2.2 Structure and Genome organization  .......... 4
   2.3 Diagnosis  ............................................ 8
   2.4 Epidemiology of Chikungunya  .............. 9
   2.5 Isolation of Chikungunya virus  ............ 11
   2.6 Clinical manifestations  ....................... 11
   2.7 Pathogenesis in chikungunya infection  .. 14
   2.8 Cytokines and their major functions .... 17
      2.8.1 Cytokine and chemokine response in viral infection .... 18
      2.8.2 Cytokine and chemokine response in chikungunya infection .. 18
   2.9 Antibodies in chikungunya infection .... 20

3. Study Area  ........................................... 22
   3.1 Andaman and Nicobar Islands, India .... 23
   3.2 Karnataka State, India ..................... 24

4. Methodology  ........................................... 28
   4.1 Ethical considerations  ......................... 28
   4.2 Outbreak investigations  ..................... 28
   4.3 Isolation and molecular characterization of *Chikungunya virus* .......... 28
      4.3.1 Observation of cytopathic effect (CPE) ...... 29
      4.3.2 Indirect immunofluorescence (IFM) assay .... 30
      4.3.3 RT-PCR assay  ...................................... 30
      4.3.4 Nucleotide sequencing ....................... 34
      4.3.5 DLST (Double Locus Sequence Typing) .. 36
      4.3.6 Molecular evolution of DEL-03 CHIKV isolate ... 39
   4.4 Follow up study to understand clinical progression .......... 44
      4.4.1 Enrolment of patients and inclusion criteria .. 45
      4.4.2 Follow-up during first month of illness and confirmation of diagnosis 45
   4.5 Investigations to study the joint pathology ........ 47
      4.5.1 X-ray and MRI  .................. 47
      4.5.2 Erythrocyte sedimentation rate .......... 47
4.5.3 Anti-cyclic citrullinated peptide (anti-CCP)  
4.5.4 IgM antibodies among follow up patients  
4.6 Assessment of various cytokine in acute and chronic CHIKF patients  
4.6.1 Multiplex cytokine assay  

5. Results  
5.1 Virus isolation  
5.1.1 Indirect immunofluorescence (IFM) assay  
5.1.2 Reverse transcription PCR assay  
5.1.3 Phylogenetic analysis  
5.1.4 Molecular evolution of DEL-03 CHIKV isolate  
5.2 Clinical spectrum  
5.2.1 Outbreak in 2006, Port Blair  
5.2.2 Follow up study to understand the clinical progression  
5.3 Clinical progression  
5.3.1 CHIKV infection during first month of illness  
5.3.2 Proportion of patients with different symptoms/signs in tenth month of follow up  
5.3.3 Cure rate in different age class  
5.3.4 Rheumatoid Factor, anti-CCP antibody, X-ray and MRI of the patients  
5.4 Role of cytokine in chikungunya infection  
5.4.1 Cytokine response in acute phase  
5.4.2 Cytokines and chemokine response in chronic CHIKV arthritis  
5.5 Persistence of IgM antibody in patients with Chikungunya fever  

6. Discussion  
7. Conclusions  
8. References  
9. Appendix  
10. List of publications
