ACKNOWLEDGEMENTS

With all sincerity, I feel blessed to accomplish this task for betterment of humanity and human health, which was carried out with the kind support of many people of Tri-city in science and research.

At first, I am grateful to my supervisors Prof. Devinder Kumar Dhawan, Department of Biophysics, Panjab University, Chandigarh and Prof. Sanjay Kumar Bhadada, Department of Endocrinology, PGIMER, Chandigarh, for their endless support, patience and motivation throughout this period. I could not have imagined having better advisors and mentors for my Ph.D. study. Their approach to perceive the new ideas positively and finding ways to make them applicable has flourished my research attitude in a manner that no one else could have done. Their excellent scientific temper and knowledge was fruitful for me to publish many articles from my thesis work. I am very thankful to Prof. Sanjay Bhadada, to provide me all the research facilities associated with department. For all my research outcomes, I am thankful to the positive attitude, freedom to work, and continuous motivation he has assisted me with. During these years of Ph.D., I have learnt many life lessons from him about management, about humanity and lovable approach for implementing actions in personal to professional life. I am very thankful to his research team (Dr. Ashotosh Arya, Dr. Vandana, Priyanka, Gurjeet and Mohin), who always encouraged and technically supported me to successfully accomplish my experiments and other research goals.

I am also sincerely thankful to Dr. Naresh Sachdeva, Department of Endocrinology, for providing necessary infrastructure and resources to accomplish parts of my research work. I am grateful to all research scholars and technical staff of the department for their ever-lasting supportive nature.

I express my sincere thanks to Dr. Sarvnarinder Kaur, Dr. Avneet Saini, Prof. M.L. Garg, Prof. Ashwani Kaul and Dr. Tanzeer Kaur, Department of Biophysics, Panjab University, Chandigarh, for providing me access to departmental facilities.

I express my sincere gratitude to Dr. Shanmugam Mayilraj, Retd. Senior Principal Scientist, MTCC, CSIR-Institute of Microbial Technology, Chandigarh, for his support and providing access to his laboratory for 2-3 years through a collaborative project. He was always there for his scientific suggestions, supporting publications and giving his best to execute proposed work in a speedy manner. His positive attitude and ever-helping nature proved to be a big contributor to flourish my personality and research career. What-ever I
know about microbiology, microbial-taxonomy, microbial genomics, whole genome sequencing, metagenomics and data analysis is just a priceless gift of his laboratory to my knowledge. In the same department, I am also thankful to Dr. Srinivasan Krishnamurthi, Scientist, MTCC, CSIR-Institute of Microbial Technology, Chandigarh, for helping me with his scientific knowledge, ideas about experiment design, support during experiments and publications. I am thankful to scientific and technical team of Dr. Mayilraj’s lab who always maintained a healthy and cheerful working environment. So I thank Monish mam, Gurwinder Mam, Bhawna Mam, Bhawna, Prabhjot, Dr. Navjot, Malkeet sir, Dr. Deepika, Pooja and Dr. Ashish.

I am grateful to Prof. Rakesh Kochhar, Department of Gastroenterology, PGIMER, Chandigarh, for his support to recruit appropriate patients for study and giving new ideas to advance the research outcomes. I am also thankful to Prof. S.K. Sinha of same department for his technical assistance provided during endoscopy procedures and duodenal biopsy sample collection.

I express my sincere gratitude to Dr. Hariom Yadav and Dr. Shalini Jain, Wake forest School of Medicine, Winston-Salem, North Carolina, USA, as they have helped to design and propose my Ph.D. thesis work and supported me till date wherever their help was required.

My sincere thanks to Dr. Mahender Bishnoi (Scientist D) and Dr. Kanthi Kiran Kondepudi (Scientist D), National Agri-Food Biotechnology Institute (NABI), Mohali, Punjab to establish a healthy collaboration for accomplishment of probiotic based work of my thesis. I am thankful to them for extending tissue culture lab facilities for accomplishment of part of an objective of my thesis. In the same institute I am very grateful to Dr. Kamlendra Yadav, who has technically guided animal tissue culture experiments in NABI.

For always motivating, encouraging, guiding me through personal to professional life, and helping me directly or indirectly, I am very thankful to my loving and caring friends/colleagues working in premier institutes of tri-city especially Mr. Abhishek Mishra, Avishek Haldar, Dr. Gazanand Sharma, Soheil, Sandeep, Rishi, Sheetal sir, Saurab sir, Anu, Komal, Nayudu, Nandini, Mahinder, Shailika, Gunjan, Kripa Shankar, Dr. Arbind Tripathi, Ajay Patial, Devika, Shivam, Rashi, Aman, Anil, Harwinder, Chandana and Shalu. I am indebted to them more than they know. They always helped to maintain my self-integrity during difficult times. I am thankful to them for their ever-lasting best wishes and belief in me.
Nothing was possible from the beginning to accomplishment of this thesis unless my family support was there. I dedicate this thesis to MY LOVING PARENTS and sister who stood by me through thick and thin always.

I sincerely acknowledge Indian Council of Medical Research (ICMR), Government of India, New Delhi, for providing me Junior Research Fellowship and Senior Research Fellowship for accomplishment of my Ph.D. I am also thankful to all the patients who have participated in this study so as to contribute to innovations for the cause of science and humanity.

Atul M. Chander
