Acknowledgements

Hard was to walk for me…. with dark all around…Hope came with your presence…and you always carved me out.. What I have been?

A rolling pebble only….with you ….n only u…I have found a sheltered ground…

These words, I would like to dedicate to my Supervisor, Dr. Vanita, Head, Department of Human Genetics, Guru Nanak Dev University (GNDU), Amritsar with my deepest gratitude. I have been amazingly fortunate to have such an advisor with immense knowledge, who gave insightful comments, invaluable guidance and constructive criticism at every stage of my research work which were thought-provoking and helped me focus my ideas. I am also grateful to her, for enforcing me to have strict validations for each research result, and thus teaching me how to do research.

I owe a great debt to Prof. Dr. Jai Rup Singh, Vice Chancellor, Central University of Punjab, (CUP), Bathinda as my co-supervisor for his guidance and ever inspiring words which instilled in me the confidence to bring this research work to its culmination. It had been a privilege to work with him.

This work would not have attained completion without the generous help, consistent inspiration and clinical guidance extended by Padma Shri Prof. Emeritus Dr. Daljit Singh, Director, Dr. Daljit Singh Eye Hospital (DSEH), Amritsar and Dr. Indu R. Singh, Retina Specialist and Eye Surgeon, (DSEH), Amritsar. I also render my due thanks to Dr. Ravijit Singh, Dr. Seema K. Singh, Dr. Kiranjeet Singh, Eye Surgeons, and all the staff members at DSEH for their help and support during data collection. I am also obliged to Dr. Madan Bagla, Retina specialist, Dr. Bagla Eye Hospital, Dabwali for undertaking ophthalmic examination of one of the RP family and their technical staff for assistance in sample collection.

I would also like to express my regards and a special note of thanks to Prof. Dr. Sharda Sidhu for her motivation. I am also thankful to Prof. Dr. A.J.S. Bhanwer, Dr. Gurstej Gandhi , Dr. Anupam Kaur, Dr. Vasudha Sambyal and Dr. Baddru’doza for their inspiration.

It would be my privilege to put on records the valuable comments and suggestions for the thesis given by Prof. R.G. Saini, Coordinator, School of Biosciences, CUP, Bathinda. I am also greatful to Prof. Dr. Jai Rup Singh and Prof. Dr. R.G. Saini for providing me the facility of sequencer at CUP, Bathinda, for sequence analysis of some of the RP families. I also do count the help and cooperation
especially provided by Dr. Pankaj Bhardwaj, Dr. Sandeep kaur Bhatia and Dr. Sanjeev Thakur during my work at CUP, Bathinda.

My special thanks to technical staff, Mr. Amandeep Walia and Mr. Manjit Singh in the department of Human Genetics for providing all the necessary help throughout my work. I am also thankful to all the non-teaching staff of the department for their help and support time to time.

Special words, full of affection and admiration to my labmates, Ms. Shiwali Goel and Ms. Sofia Bhatia for their cooperation and very timely help and concern.

Support and care of my friends, Loveleen, Archana, Harmeet, Jyoti, Isha, Nisha, Manju, Talwinder, Priyanka, Harpreet and Richa, in due course of my research work have helped me overcome difficulties and stay focused. I greatly value their friendship and deeply appreciate their belief in me.

Most importantly, this would have been not possible without the love and patience of my parents. I am indebted to my ideal, my father Hony. Capt. Om Prakash Saini and my mother Mrs. Prem Lata for their unconditional love, patience and providing me with rock solid support, especially during the final stages of my work for its timely completion. I also count the love, blessings and admirations of my sister, Mrs. Sakshi and brothers; Mr. Paramjeet and Mr. Pradeep, who made me stand through all odds. I have no words to count the contributions of little angels, my niece Saumya and nephews Naman and Prajjwal, who always brought smiles to my face in tough times.

I would like to thank all of the participants in the study for their help and cooperation throughout. Without their participation, this research would not have been possible.

I duly acknowledge the financial support from Department of Biotechnology grant (BT/IN/German/13/VK/2010), Delhi and Guru Nanak Dev University, Amritsar, for providing me the research grant and fellowship for the research work undertaken in this dissertation.

Above all, I would like to thank omnipresent Almighty God for providing me the intellect and giving me the strength to complete this piece of research work.

Seema Saini
