Acknowledgements

It gives me immense pleasure to express my gratitude to my supervisor Dr. Arvind Gulati, Scientist, Institute of Himalayan Bioresource Technology, Palampur for his guidance, valuable advice, and encouragement during the entire course of my research work and thesis writing. He always encouraged critical and independent thinking and shared valuable research and professional insight to inculcate the attributes of an independent researcher. The well equipped Microbiology and Plant Pathology Laboratory provided me with much more than an enabling platform with its supportive and motivating work environment.

I am beholden to Dr. Paramvir Singh Ahuja, Director, Institute of Himalayan Bioresource Technology, Palampur for providing me the opportunity to work at this esteemed institute with the state-of-art infrastructure and congenial atmosphere to research.

My sincere thanks are due to Dr. K. C. Sharma, Associate Professor, Vegetable Sciences, HAREC CSK HPKV, Bajaura for his participatory support in conducting field experiments at the Experimental Farms of the agriculture university at Bajaura and to Dr. Virendra Singh, Scientist, Institute of Himalayan Bioresource Technology, Palampur for his support in conducting field experiments at the Experimental Farms of the institute at Chandpur. Thanks are also due to Dr. S. P. Sharma, Head, Soil Sciences, CSK HPKV, Palampur for the valuable discussions about setting up the pot experiments. I am also beholden to Prof. B. S. Chadha, Department of Microbiology, Guru Nanak Dev University, for his advice on Response Surface Methodology for biomass production of the microbial inoculant. My gratitude is also due for the advice during HPLC analysis of indole derivatives by Dr. Ashu Gulati, Scientist, Institute of Himalayan Bioresource Technology and organic acids by Dr. Bikram Singh, Scientist, Institute of Himalayan Bioresource Technology. Sincere thanks are also due to Dr. Kamlesh Singh, Head, Department of Statistics, Mathematics and Physics, CSK HPKV, Palampur and Dr. R. D. Singh, Scientist, Institute of Himalayan Bioresource Technology, Palampur for their valuable suggestions in statistical analysis.

Technical support by Mr. Digvijay Singh Nanuka in DNA sequencing, Ms. Vijaylata Pathania in HPLC operations, and Mr. Ramdean Prasad in chemical analysis of soil samples and plant materials is greatly appreciated and acknowledged. I am also thankful to Mr. Robin Singh for his help in HPLC analysis of the indole derivatives.

I would take this opportunity to extend my thanks to Dr. H. S. Saini, Former Head, Department of Microbiology, and Dr. Sajid Hussain, Head, Department of Microbiology, Guru Nanak Dev University, for their administrative support during enrolment, registration and submission of thesis.

Warm thanks are due to my lab mates for their support, co-operation, and cordial atmosphere throughout this endeavour. A word of special thanks is due to Mr. Praveen Rahi and Mr. Avinash Rana on this note for their unstinted help during field experimentation.

The award of Research Internship under the ‘Diamond Jubilee Research Intern Award Scheme’ by the Institute of Himalayan Bioresource Technology and Senior Research Fellowship by the Council of Scientific and Industrial Research, Govt. of India is also acknowledged.

Most importantly thanks to all my family members for their never ending support, endless encouragement and inspiration throughout my educational career. Specials words of thanks are due to my husband for his immeasurable support and patience that always infused strength in me.

(Pratibha Vyas)
