Acknowledgement

Embarking on the unenviable task of writing an acknowledgement is never easy because of the simple fact that a sincere feeling of gratitude cannot be expressed in words. However one can not break away from conventions either.

To begin with I express my extreme sense of gratefulness to my supervisor Dr. Nazibuddin Ahmed, Professor, Department of Mathematics, Gauhati University, Guwahati for giving the opportunity to work on this topic. His constant guidance, comments, suggestions and critical evaluations as a Thesis-Guide have been invaluable, to say the least.

I would always remember the inspiring presence of Dr. Rita Chaudhury, Head of The Department of Mathematics, Gauhati University, Guwahati during the preparation of my thesis.

I do not have words to describe my sincere gratitude to my colleague Mr. Hiren Deka for his invaluable help at a crucial juncture. My special thanks go to Dr Dipak Sarma for his invaluable advice from time to time. I also can not forget the constant encouragement from the other colleagues of my department.

I am indebted to different authors (mentioned in the references), whose work I have consulted.

There is no denying of the fact that this work would not have been possible without constant encouragement and help from my parents and my husband Dr. Prafulla Sarma. It was my son Himon, who was deprived of my care for innumerable hours during last few years and I will remember this forever.

Last but not the least, blessing from my parents in law and other members of the family including my sisters indirectly helped me to keep on pursuing my goal.

Dated: Guwahati the……………2012

Kalpana Sarma
Associate Professor in Mathematics
Cotton College, Guwahati
