Acknowledgements

It is difficult for me to express in words my deep gratitude to all those who have contributed to the accomplishment of this goal in my life that constitutes a PhD degree. However, in an attempt to acknowledge them formally, I would like to thank in first place my parents Alonso and Lucelly, my sister Gloria and my brother Diego, who have supported me in different ways during all the years of my education until today.

A special thanks to Alexis Velez, who has given me his unconditional love during all these years and who encouraged me to accept the challenge of living away from home and friends (including him), in such a different place to me as it is India. I also want to thank to my friends in Colombia Elisa Londono, Luisa M. Alvarez, Adriana Correa, Juan Gabriel Pineros, Maria Antonia Rios, who were always present through e-mail to remind me that I am not alone.

Thanks to Dr. Silvia Blair, Dr. Jorge Ossa, Dr. Amanda Maestre and all my colleagues at University of Antioquia (Colombia) for their support at a personal and professional level.

Special thanks to ICGEB, Trieste for the opportunity given to me to carry out the PhD programme and for the Research Fellowship.

I would like to thank Professor V.S. Chauhan, Director of ICGEB and Head of the Malaria Group for giving me the opportunity to work in his group and for the time that he has dedicated to me whenever I needed his help. I want to thank Dr. Ashima Kushwaha, who was my supervisor during the first two years of my PhD and who took a lot of effort to patiently teach me the different techniques of molecular biology and protein biochemistry. Her scientific attitude and her meticulous organization to design the experiments have helped me to improve my work. She has always been ready to guide me at any time, even after she left ICGEB.

I would like to thank Dr. Asif Mohmmed, who has help me a lot at all the stages of my PhD and who has had enough patience to be my supervisor during the last two years but also enough patience to be an excellent friend.
To Dr. Paushali Mukherjee, who taught me about the immunological techniques and the work with mice, I acknowledge her important contribution to the discussion of my results and her disposition to help me at anytime.

I want to express my special respect to Dr. Pawan Malhotra, Dr. Renu Tuteja, Dr. Chetan Chitnis, Dr. Dinkar Sahal and Dr. Shams Yazdani for their valuable suggestions and for being ready to help out whenever it was necessary.

My sincere acknowledgment to Dr. Chandramouli, Rakesh and Ashok Das at the Animal House facility for their tremendous help in handling the experimental animals, which facilitate my work.

A special recognition to Ms. Richa Arya, Ms. Gita Prakah, Ms. Susan Vincent, Ms. Tina Dias, Ms. Pratibha Chaturvedi and Mr. Sovan Singh for their cooperation with the administrative matters throughout this time.

To all the past and present members of the Malaria Lab, specially Suraksha, Suman, Arun, Narender, Reshma, Manzar, Sujatha, Gowthaman, Sangeeta, Sutikshan, Alfredo, Antonieta for their cooperation at different stages of my work.

I want to acknowledge Ajay Pal, a person who has changed my vision of life and the relation with myself in many aspects. His contribution to the completion of this work is indescribable.

I want to thank to my seniors Das, Vineetha, Sidharth, Punjab, Anuja, Wricha, Mintu, Kannan, BN Singh, from whom I have learnt not only science but also about friendship.

A very special thanks to Janeth Rodriquez, Chanaki Amaratunga and Adriana Ovalle, who became my true family in India during the last two years and most difficult period of my PhD.

Tatiana
