Acknowledgements

I thank Dr. Ramesh V. Sonti, my supervisor whose guidance has enabled me to complete this thesis work. His teaching has significantly improved my approach to design of experiments and presentation of scientific data. I thank him for his efforts and his encouragement throughout the last six years.

I thank Dr. Lalji Singh, director, CCMB, for bringing excellent facilities in this institute. It has been a privilege to work here. I thank him for all his efforts and admire his constant endeavor to make CCMB into a world-class institute.

I thank Vishnupriya and Hitendra for collaborating with me in the work presented in chapter 3. This project could not have been completed without their help.

All members of Sonti lab have helped at one time or another during the last six years. I am grateful for their help.

I thank Hanumanth and Pandu from Sonti lab for providing me glassware and plants anytime. The high quality color pictures presented in chapter 3 are due to the efforts of staff of photography section as well as Nageshwara Rao and Girdharan of digital imaging. Prakash and Mallesh of Xerox facility have also helped in thesis compilation. I would also like to thank instrumentation, particularly for maintaining our below ambient incubators in working condition as it was very crucial for all experiments.

Many people in CCMB have helped me during my stay here for the last six years. I apologize for not mentioning their names and thank them sincerely.

Finally, I would like to acknowledge Council of Scientific and Industrial Research (CSIR) for providing me financial assistance for the first five years of my PhD.

Sujatha
