The research presented in this licentiate thesis has been carried out in the Department of Human Genetics, Guru Nanak Dev University, Amritsar. The path towards this thesis spans years of research work and many people have been involved and contributed to the presented ideas and understanding gained. It is my pleasure to thank all of them who helped me directly or indirectly in the completion of my doctoral education and compilation of this thesis.

Up and above everything, all glory to thee creator of the Universe, the most intelligent and lord of creation who made human on one base that he can think. I feel immense pleasure in expressing my deep sense of gratitude and indebtedness to WAHEGURU, the almighty God, who mercifully felt me worthy of his blessings.

Acknowledgement is not merely a formality but an emotional association, which I have with the person who helped me to achieve this goal. So, I am grateful and sincerely acknowledge the precious and irreproachable supervision of my esteemed guide Prof. AJS Bhanwer for providing me an opportunity to work under his supervision and inspired me in pursuance of this work. I will always be indebted to him for his sustained encouragement, affection and inspiration at every stage of this work. It was his much concerned and considerate guidance which kept me in the right direction throughout the course of my research work. He has always remained my guiding light, my best critic and provided me with sound conceptual foundation. If there is any novelty in my work it is borne in the insights of my supervisor, his ability to steer me from the cliffs. He represented a true stimulus towards the best throughout my PhD work.

I extend my deep gratitude and reverence for my co-supervisor Prof. RNK Bamezai, who ploughed through several preliminary versions of my text, making critical suggestions and posing challenging questions. His expertise, invaluable guidance, constant encouragement, affectionate attitude, understanding, patience and healthy criticism added considerably to my graduate experience. Without his continual inspiration, it would have not been possible
to complete this study. His wide knowledge and enthusiasm of research and novel ideas to
approach a research problem have been a major source for me to proceed through my doctoral
program by hard work, consistency and determination. His association will remain a beacon
light to me throughout my career.

I am immensely grateful to all my senior fellows. The scientific assistance provided by Dr.
Sailesh Gochhait, Dr. Sawerkar Sharma, Dr. Audesh Bhat, Dr. Ranjana Pal, Dr. Niloo
Srivastava, Dr. Prithvi Raj Sharma, Dr. Ekta Rai Sharma, Dr. Kawal Matharoo, Dr.
Shweta Singh, Dr. Vibhor Gupta, Dr. Anita Kaul, Dr. Shweta Aggarwal, and Dr. Meenu to
complete my work have been indispensable, all of whom have been extremely helpful
whenever I approached them. I express my heartfelt thanks to Shafat Ali for his helping
nature. Thanks to all my lab members for providing a healthy and scientific working
atmosphere. Nabodita Kaul deserves a special mention for assisting me to carry out
experiments and support whenever required. My hearty thanks to Surabhi, Amit, Kalai,
Rajnish, Rupali, Anita Behura, Mamta, Bhupender, Askandar, Shilpi, Archita, Noor,
Siddharth, Shazia, Gopinath, and my labmates at Human Genetics department Shivani
Vats, Rubina Sharma, Jasmine Sokhi, Priyanka Raina, Ruhi Sikka, Maggi Alluwalia,
Basanti Barna for their friendly and supportive nature. I would also like to thank Ritu
Bhardwaj, Randhir Singh, Shweta and Sheetal Koul my postgraduate dissertation student
for their assistance.

I owe my sincere gratitude to Dr. Vanita Kumar, Head, Department of Human Genetics,
Guru Nanak Dev University, Amritsar, for her unwavering help and support. I would like
to thank other faculty of the department, Prof. Sharda Sidhu, Dr. Gursatej Gandhi, Dr.
Vasundhra Sambyal and Dr. Badruddoza, Dr Kamlesh Guleria, Dr Manpreet, Dr. Anupama
for their kind support and for their time to time suggestions throughout the course of my
research work. The acknowledgement would be incomplete if I do not express my gratitude to
the nonteaching staff of the Department of Human Genetics, Amritsar department for
providing me the help and cooperation to pursue my work during this course of study. Same
gratitude I extend to staff members at NCAHG, Mr. Somnath, Mrs Rita Raina, Mr
Kamtanath, and Mr Ghanshyam. I greatly acknowledge National Centre Of Applied Human
Genetics (NCAHG) and Council of Scientific and Industrial Research (CSIR), New Delhi, for providing financial assistance in the form of Senior Research Fellowship which buttressed me to perform my work comfortably.

I duly acknowledge Dr Puneet Arora, Dr. Arvinder Pal Singh, Dr. Param Pal Singh, Dr. Devinder, Dr. Varinder Saini for providing support and help in collection of blood samples and I also acknowledge all the people who volunteered to bear the prick and provide me their valuable blood samples, without which this work could not be possible.

I show my cordial affection to my friend Dr. Parampal Singh Bhullar and his family did for their love and care. I always remember the great time that I had spent with Pavit didi, Kirpneet and Parmvir. I also cordially thank for their support during my stay at Amritsar.

I feel a deep sense of gratitude for my family members who are always there to exchange my troubles to their love and affection; they are always there next to me, making me feel proud, helping me to tackle anything and achieving my aim. Anything I say about my family would be an under representation of the love, encouragement and co-operation, that they granted me. I wish to thank my mother and father, who have remained my pillars of strength and focus. I could not have achieved anything without their constant encouragement and faith in me, which were my driving force. My brother, sister in law, brother in law, sister, Sarvnoor and my sweet niece Guneet whose love and encouragement allowed me to finish this journey. I owe my family everything, my eternal gratitude and wish I could show just how much I love and appreciate them. I am also indebted to my relatives and well-wishers for their help throughout my life. I hope that this work makes you proud.

In the last but not the least, I want to thank every person who helped me directly or in directly and whose name couldn’t find a mention here, I will always remain grateful of them.

Though every possible effort was made to bring out a complete and comprehensive thesis on the selected topic with the able guidance of my supervisor, errors, if any, are purely mechanical and solely mine.

YOGINDER PAL SINGH
