Acknowledgements

Getting to this point in my education has been a fantastic journey, and I have received wonderful love and support from my family and friends. A love of learning was instilled in me at a young age by my parents and siblings, and I seemingly have tried to stay in school for as long as possible thanks to them!

I really believe that I had the kindest, and most supportive, supervisor Prof. Subodh Kumar. I have learned so much from him. I am still in awe today at his remarkable knowledge of chemistry, and his capacity to teach it so effectively and patiently. I am so grateful for the start I have received from him, and I hope that I can take the knowledge I learned from him and make him proud during my career.

I am also thankful to Prof. I. Ahmed, Prof. Subodh Kumar and Prof. Balwinder Singh Randhawa being Head, Department of Chemistry, Guru Nanak Dev University, Amritsar, for providing me the required laboratory facilities and other administrative assistance for carrying out the research work during this period.

A special thanks are due to Mrs. Sangeeta, for the affection & care. And all the people of my lab & all other my friends, whom list might be too long, who provided help and steady encouragement during this period, especially, Dr. Navneet Kaur, Assistant Professor, PU, Chandigarh for being like an elder sister at work place.

I also take this opportunity to thank non-teaching staff of the department for providing administrative and other assistance during this period. The financial support by CSIR, New Delhi is gratefully acknowledged. I also thank CDRI, Lucknow and IISc Bangalore for mass spectra.

I am indebted to, and extremely grateful for, my grandparents and parents for their love, encouragement and prayer that have helped me from preschool till now to achieve my academic goals. Both my mother and father have been excellent role models teaching me hard work and commitment to my goals. My mother, Mrs. Paramjit Kaur, has been a wonderful encourager and supporter throughout my studies.

A priceless thanks is reserved for my Parents-in-laws for their cherishable understanding for me. Also, I express my appreciation to my brother-in-law Harjit Singh (Bubby) for his warm affection.

Hortative, solace and sensible horizon support of my husband, Kulwant Singh, always tugged my heartstrings beyond who actualized the real meaning of relationship by providing me emotional security, sensible guidance and everlasting motivation which always inspired me to achieve the heights. His concerned attitude though being completely unknown as an organic chemist, is extremely valuable for keeping my moral high. Language cannot describe what I feel about his grandeur reflected in the standards of his modus operandi.

It is by faith and prayer that I have survived till now. My Lord and Savior has blessed me with an ability to pursue studies in chemistry. I have learned so much about the wonder of His creation, and I look forward to pursuing it for a lifetime. It is through the strength and peace that I find in God that I can do all things.
