List of Tables

2.1 Comparison of various heuristic-based scheduling algorithms.......................... 32
2.2 Comparison of various ACO based scheduling algorithms............................... 40
2.3 Comparison of various GA based scheduling algorithms................................. 48
2.4 Comparison of various PSO based scheduling algorithms............................... 56

4.1 Initial soil between tasks and VMs for the sample workflow......................... 82
4.2 Tasks with their b-level ranks for sample workflow..................................... 84
4.3 Probability of assigning task \( t_i \) to available VMs..................................... 86
4.4 Coefficient of variation for each algorithm.................................................. 92
7.1 Voltage-Relative Speed Pairs........................................................................... 136
