Acknowledgement

This thesis work will not be completed without acknowledging all those who have made direct and indirect contribution during the entire duration of my research. Commencing with my guide Dr. Vikas Kumar, an active researcher and a wonderful person, he has given me very valuable suggestions during the entire research period. I do remember my first abstract, the way it was written and the wonderful way he has guided and corrected it. I have not only learned research aptitude but also effective ways of representing paper, starting from the title itself. He entrusted a lot of trust on me from the beginning itself and also given me opportunity to contribute in International conference M4D2012, organized jointly by SERD, India and Karlstad University Sweden, Feb 28-29, 2011, New Delhi. Beyond, he has also supported me during the worst days of my life and career, which I encountered during my research period.

I will also like to thanks to many of my colleagues/friends, Dr. Arpita Agarwal, Dr. Ravish Sharma and Mr. Sumit Agarwal from PGDAV College, University of Delhi, Mr. Vivekanand Jha from IGIT, GGSIP University, with whom I discussed a lot about research and got a number of research tips. Beyond the above names, there are many more persons who have really helped me during this research work. It was a wonderful experience in submitting the research paper to Interdisciplinary journal of Information, Knowledge, and Management (IJIKM) and learned from the comments of the editorial board. It has really changed my entire thought process. It would be worth mentioning the support from the University of Delhi in downloading good research papers from IEEE, ACM and Elsevier etc. I will also like to thank Dr. D.K. Batra, Director, Asia-Pacific Institute of Management and Prof. Saurabh Mittal, HOD-IT for providing me the required infrastructural support needed during the research.

I wish to attribute my success to my parents, who have not only encouraged me but also financially supported me, apart from taking care of themselves in very old age. I also thank my wife Nitu and son Varunjit who have supported and encouraged me during this research.

Finally, I devote my thesis work to my younger sister, Late Anita who has departed untimely (25 May 1979 to 02 Mar 2011), in very young age.

(Jitendra Singh)
