List of Table

Table 1.1: Difference in mainframe and cloud computing

Table 1.2: Key Attributes of Cloud Services

Table 1.3: Use of Web 2.0

Table 1.4: Cloud Computing Application

Table 2.1: Prominent Regulatory Compliances

Table 2.2: Cloud Service Outages

Table 3.1: Configuration management tools

Table 3.2: Automation Tools

Table 3.3: Comparison Of Cloud Management Tools

Table 4.1: Data Center Locations of Prominent Cloud Provider

Table 4.2: Provider and factor for monitoring

Table 4.3: Region and Country Allocation

Table 4.4: Architecture of Data Center

Table 4.5: Hardware Units of Data Center

Table 4.6: User Base Configuration

Table 4.7: Application Deployment architecture

Table 5.1: Load Balancing Algorithm

Table 5.2: Service Broker Policy

Table 5.3: Broker Service Policy Response time

Table 5.4: Load Balancing Techniques RT

Table 5.5: Data Center Processing Time

Table 5.6: Response time Dependency on Number of Data Center

Table 5.7: Region Wise Response Time

Table 5.8: Combination of Service Policy and Load Balancing Algorithm

Table 5.9: Response time Closest Data Center

Table 5.10: Response time for Optimum Response Time

Table 5.11: Response time RDL
Table 5.12: Comparison Response Time among best Combination
