2.3 Studies related to Mathematical Anxiety and Mathematical Achievement

3 PLAN AND PROCEDURE 91-108

3.1 Research Methodology
3.2 Identification of the Variables
3.3 Population and Sample
  3.3.1 Population
  3.3.2 Sample
3.4 Distribution of the Sample
3.5 Tools Used
3.6 Description of the Tools
  3.6.1 Mathematical Achievement Test
  3.6.2 Problem Solving Ability
  3.6.3 Mathematical Attitude
  3.6.4 Mathematical Anxiety
3.7 Data Collection
3.8 Scoring Procedure
  3.8.1 Scoring Procedure of Mathematical Achievement Test
  3.8.2 Scoring Procedure of Problem Solving Ability Test
  3.8.3 Scoring Procedure of Mathematical Attitude Test
  3.8.4 Scoring Procedure of Mathematical Anxiety Test
3.9 Statistical Techniques used

4 ANALYSIS AND INTERPRETATION 109-172

SECTION-I
4.1 Demographic Profile of the Sample

SECTION-II
4.2 Descriptive Statistics
  4.2.1 Level of Mathematical Achievement of Secondary School Students with respect to School type, gender and locality
  4.2.2 Level of Problem Solving Ability of Secondary School Students with respect to School type, gender and locality
  4.2.3 Level of Mathematical Attitude of Secondary School Students with respect
4.2.4 Level of Mathematical Anxiety of Secondary School Students with respect to School type, gender and locality

SECTION-III

4.3 Analysis of Normal distribution of the scores
   4.3.1 Normal Quantile-Quantile (Q-Q) plot of Mathematical Achievement of Secondary School Students
   4.3.2 Normal Quantile-Quantile (Q-Q) plot of Problem Solving Ability of Secondary School Students
   4.3.3 Normal Quantile-Quantile (Q-Q) plot of Mathematical Attitude of Secondary School Students
   4.3.4 Normal Quantile-Quantile (Q-Q) plot of Mathematical Anxiety of Secondary School Students

SECTION-IV

4.4 Analysis of Relationship
   4.4.1 Relationship between mathematical Achievement and Problem Solving Ability of Secondary School Students
   4.4.2 Relationship between mathematical Achievement and Mathematical Attitude of Secondary School Students
   4.4.3 Relationship between mathematical Achievement and Mathematical Anxiety of Secondary School Students
   4.4.4 Relationship between Problem Solving Ability and Mathematical Attitude of Secondary School Students
   4.4.5 Relationship between Problem Solving Ability and Mathematical Anxiety of Secondary School Students
   4.4.6 Relationship between mathematical Attitude and Mathematical Anxiety of Secondary School Students
SECTION-V
4.5 Regression Analysis
   4.5.1 Prediction of Dependent Variable namely Mathematical Achievement in relation to Independent Variables namely Problem Solving Ability, Mathematical Attitude and Mathematical Anxiety of Secondary School Students with regard to School Type, Gender and Locality

SECTION-VI
4.6 Analysis of Differences
   4.6.1 Analysis of Differences of Mathematical Achievement on the Basis of School Type, Gender & locality
      4.6.1.1 Comparison of mean values of Mathematical Achievement on the basis of School type
      4.6.1.2 Comparison of mean values of Mathematical Achievement on the basis of Gender
      4.6.1.3 Comparison of mean Values of Mathematical Achievement on the basis of Locality
   4.6.2 Analysis of Differences of Problem Solving Ability on the Basis of School Type, Gender & locality
      4.6.2.1 Comparison of mean values of Problem Solving Ability on the basis of School type
      4.6.2.2 Comparison of mean values of Problem Solving Ability on the basis of Gender
      4.6.2.3 Comparison of mean Values of Problem Solving Ability on the basis of Locality
   4.6.3 Analysis of Differences of Mathematical Attitude on the Basis of School Type, Gender & locality
      4.6.3.1 Comparison of mean values of Mathematical Attitude on the
basis of School type
4.6.3.2 Comparison of mean values of Mathematical Attitude on the basis of Gender
4.6.3.3 Comparison of mean Values of Mathematical Attitude on the basis of Locality
4.6.4 Analysis of Differences of Mathematical Anxiety on the Basis of School Type, Gender & locality
4.6.4.1 Comparison of mean values of Mathematical Anxiety on the basis of School type
4.6.4.2 Comparison of mean values of Mathematical Anxiety on the basis of Gender
4.6.4.3 Comparison of mean Values of Mathematical Anxiety on the basis of Locality

5 FINDINGS, IMPLICATIONS AND SUGGESTIONS FOR FURTHER RESEARCHES 173-194

SECTION-A
5.1 Main Findings of the Study
5.1.1 Findings based on Descriptive Statistics
5.1.2 Findings based on analysis of Normal Distribution of Scores
5.1.3 Findings based on Analysis of Relationship
5.1.4 Findings based on Regression Analysis
5.1.5 Findings based on Differences

SECTION-B
5.2 Discussion of the results
5.2.1 Discussion of results on the basis of Correlation
5.2.2 Discussion of results on the basis of Regression Analysis
5.2.3 Discussion of results on the basis of Differences

SECTION-C
5.3 Implications
5.3.1 Implications for Teachers
5.3.2 Implications for Students
5.3.3 Implications for Parents
5.3.4 Implications for Schools, Educational Bodies and Curriculum Planner

SECTION-D

5.4 Suggestions for Further Researches

SUMMARY 195-220
BIBLIOGRAPHY 221-240
APPENDICES
