ACKNOWLEDGEMENTS

This thesis is the culmination of my journey of Ph.D which was just like climbing a high peak step by step accompanied with encouragement, hardship, trust, and frustration. When I found myself at top experiencing the feeling of fulfillment, I realized though only my name appears on the cover of this dissertation, a great many people including my family members, well-wishers, my friends, colleagues and various institutions have contributed to accomplish this huge task.

At this moment of accomplishment I am greatly indebted to my research guide, Dr. Amrita Bajaj, Former Professor of Pharmaceutics, C. U. Shah College of Pharmacy and Professor & HOD, Pharmaceutics, SVKM’s BNCP, who accepted me as her PhD student and offered me her mentorship, motherly love and care. This work would not have been possible without her guidance and involvement, her support and encouragement on daily basis from the start of the project till date. Under her guidance I successfully overcame many difficulties and learnt a lot. Her own zeal for perfection, passion, unflinching courage and conviction has always inspired me to do more. She has taught me another aspect of life, that, “goodness can never be defied and good human beings can never be denied”. For all these, I sincerely thank her from bottom of my heart and will be truly indebted to her throughout my life time.
