Acknowledgement

It is a great pleasure to express my deep thanks and gratitude to my supervisor, Dr. Mojibur R. Khan, Associate Professor, Life Sciences Division, Institute of Advanced Study in Science and Technology (IASST) for his valuable guidance, keen interest, inspiring motivations, and thought provoking suggestions in planning and executing the research work. His careful editing contributed enormously to the production of this thesis.

I also owe my heartfelt gratitude to my joint supervisor Prof. M. C. Kalita, Department of Biotechnology, Gauhati University, Guwahati, Assam for his guidance, support and invaluable suggestions during the research work. Without his help, my thesis would not have been possible.

I take this opportunity to express my sincere thankfulness to Dr. N. C. Talukdar, Director, IASST, Guwahati, Assam for continuous encouragement and unrestricted support in providing various research facilities during the Ph.D. research work.

Special word of thanks to Dr. Supriyo Sen for his whole hearted help and support in several ways during the PhD work. I extend my sincere thanks to Mr. Ailek Chakhap for the help during the sample collections and consistent support in the laboratory.

Special note of thanks to my lab seniors, Dr. Sushmita, Dr. Rupamani, Dr. Sailendra, Dr. Atanu and lab members, Ms. Madhusmita, Priyanka, Jintu, Bhuwan, Tulsi, Dibyayan, Shantanu, Shadab, Sujata, and Jilmil for the friendly behavior and unconditional support during my whole tenure in lab.

It would not have been possible to undertake this journey of my career, and to reach where I am today without the support of my beloved parents, my brother Bhagwan, my sisters, Gitanjali, Pallavi and Kalyani and family members for extending all round support,
blessings and selfless moral boost which energized me with immense confidence towards completion the degree.

Above all, I express my gratefulness to the almighty for making me able to achieve whatever I have.

(Yogesh Babasaheb Chaudhari)
