

**TABLE OF CONTENTS**

**List of Tables** i-ii  
**List of Figures** iii  
**Abbreviations** iv-v  
**Abstract** vi-ix

**Chapter 1: Review of Literature** 1-23

1.1 General Overview 1  
1.2 Homocysteine Metabolism 2  
1.3 Factors Affecting the Levels of Homocysteine 4  
1.3.1 Life Habits 4  
1.3.1.1 Physical Inactivity 4  
1.3.1.2 Obesity 5  
1.3.2 Non-modifiable Factors 5  
1.3.2.1 Age and Sex 5  
1.3.2.2 Family History 5  
1.3.3 Modifiable Factors 6  
1.3.3.1 Smoking 6  
1.3.3.2 Alcohol Consumption 6  
1.3.3.3 Coffee Consumption 7  
1.3.4 Diseases 7  
1.3.4.1 Hypertension 7  
1.3.4.2 Renal Failure 8  
1.3.4.3 Cancer 8  
1.3.5 Genetic Factors 9  
1.3.5.1 Polymorphisms in MTHFR 9  
1.3.5.2 Polymorphisms in CBS 10  
1.3.5.3 Polymorphisms in other Genes 10  
1.3.6 Dietary Factors 11  
1.3.6.1 Vitamin B 11  
1.3.6.2 Folate 12  
1.3.6.3 Lipids 13  
1.3.7 Other Factors 13  
1.4 Mechanism of Action of Homocysteine 14  
1.4.1 Oxidative Stress Hypothesis 14  
1.4.2 The Molecular Target Hypothesis 15  
1.4.3 Endoplasmic Reticulum Stress 16  
1.4.4 Epigenetic Modulation 17  
1.5 Homocysteine in Cardiovascular Diseases 18  
1.6 CAD and Homocysteine Research in India 21
Chapter 2: Factors Affecting the Levels of Homocysteine: A Risk Factor for Coronary Artery Disease 24-55

2.1 Introduction 24
2.2 Materials and Methods 26
  2.2.1 Study Individuals 26
  2.2.2 Plasma, Serum Separation 26
  2.2.3 Biochemical Analysis 27
    2.2.3.1 Homocysteine and Cysteine 27
      2.2.3.1.1 Reagents and Buffers for Homocysteine and Cysteine Measurements 27
    2.2.3.2 Vitamin B12 Measurement 28
    2.2.3.3 Folate Measurement 28
  2.2.4 DNA Isolation 29
    2.2.4.1 Reagents and Buffers for DNA Isolation 30
  2.2.5 SNPs Selected for the Study 31
  2.2.6 Oligonucleotides 34
  2.2.7 Polymerase Chain Reaction 34
  2.2.8 Purification of PCR Products 34
  2.2.9 SNaPshot (Minisequencing) 35
  2.2.10 Genotyping Strategy 35
  2.2.11 Statistical Analysis 36
2.3 Results 37
  2.3.1 Vegetarian Diet is Associated with CAD 37
  2.3.2 Vitamin B12 Deficiency is Associated with CAD 39
  2.3.3 Vegetarian Diet leads to Low Vitamin B12 and Elevated Thiol Levels 39
  2.3.4 Correlation of Biochemical Parameters 40
  2.3.5 CAD and Thiols 41
  2.3.6 Association of nsSNPs with Biochemical Parameters 41
2.4 Discussion 50

Chapter 3: Basal Frequency of SNPs from Genes Involved in Homocysteine Metabolism and Coronary Artery Disease 56-79

3.1 Introduction 56
3.2 Materials and Methods 58
  3.2.1 Study Individuals 58
  3.2.2 Strategy 58
  3.2.3 Denaturing High Performance Liquid Chromatography (dHPLC) 59
  3.2.4 DNA Sequencing 61
3.2.5 Illumina Golden Gate Assay 61
3.2.6 Sequenom MassARRAY System 63
   3.2.6.1 PicoGreen Solutions 63
   3.2.6.2 Genotyping Quality Control Measures 65
3.3 Results and Discussion 66

Chapter 4: INSIG2 Polymorphism and BMI in Indian Population 80-93

4.1 Introduction 80
4.2 Materials and Methods 82
4.3 Results 84
4.4 Discussion 88

Summary and Conclusions 90-93

References 94-114
