

CONTENTS

	Page
1. PREFACE	1
2. ACKNOWLEDGEMENT	11
3. ABBREVIATIONS	111
4. INTRODUCTION	1
5. PREVIOUS WORK	3
NITRATE REDUCTASE	3
GENERAL CHARACTERISTICS	3
REGULATION OF NITRATE REDUCTASE	9
Substrate Induction	9
Effect of Light	11
Effect of Sugars and Organic Acids	15
Inactivation and Activation/ Stabilization	17
Effect of NADH	21
End Product Regulation of Nitrate Regulation	31
NITRITE REDUCTASE	43
GLUTAMATE DEHYDROGENASE	48
GLUTAMINE SYNTHETASE	53
6. MATERIALS AND METHODS	57
Plant Material and Growth Conditions	57
Treatments	57
Enzyme Extractions	58

Enzyme Assays	59
Protein Estimation	64
Estimation of Nitrate	65
Oxygen Uptake	69
Chlorophyll and Carotenoid Estimation	69
Determination of Radioactivity in Protein and RNA	70
Chemicals	70
7. RESULTS	71
INDUCTION OF NITRATE REDUCTASE BY KNO_3 AND NH_4NO_3	71
Effect of Different Concentrations of KNO_3 and NH_4NO_3	71
Kinetics of Nitrate Reductase Induction	71
Effect of Light on Ammonium Stimulated Induction of Nitrate Reductase Activity	73
Effect of Age on Ammonium Stimulated Induction of Nitrate Reductase Activity	78
Effect of Temperature on Ammonium Stimulation	81
MECHANISM OF AMMONIUM STIMULATION OF NITRATE REDUCTASE	84
Effect of Ammonium on Nitrate Uptake	84
Effect of Amino Acids on Nitrate Reductase Activity	86
Effect of Ammonium on RNA and Protein Synthesis	90
Ammonium Stimulation of Nitrate Reductase in the Absence of Nitrate	94
Effect of Ammonium on Nitrate Reductase Stability	105

Effect of NADH, Ferricyanide on Nitrate Reductase <u>In Vitro</u>	108
Effect of Ammonium on Photosynthetic Pigments and on Oxygen Uptake	118
Effect of Ammonium on Photosynthesis, Respiration and Photorespiration	121
Simulation of Ammonium Effect by the Intermediates of Photosynthesis, Respiration and Photorespiration	128
Effect of Ammonium on Cytochrome C Reductase	137
Effect of Ammonium on Nitrite Reductase	144
Effect of Ammonium on Glutamate Dehydrogenase	144
Effect of Ammonium on Glutamine Synthetase	150
6. DISCUSSION	156
EFFECT OF NITRATE AND AMMONIUM ON THE INDUCTION OF NITRATE REDUCTASE	156
MECHANISM OF AMMONIUM REGULATION OF NITRATE REDUCTASE	158
Affecting Nitrate Uptake	158
Increasing General RNA and Protein Synthesis	159
Through Ammonium Specific Protein - Post-Transcriptional and Translational Control	160
Feedback Control and Affecting the Activity of Ammonium Utilizing Enzymes	164
Via NADH	167
Role of Photosynthesis, Respiration and Photorespiration	170
Hypothesis of Ammonium Regulation of Nitrate Reductase	176

9.	SUMMARY	180
10.	REFERENCES	184
11.	APPENDIX	222
