ACKNOWLEDGEMENTS

It gives me immense pleasure to acknowledge my thesis supervisor Dr. R. Srinivasan, without his guidance I would never have been able to complete my thesis. First of all, I would like to thank him for giving me the opportunity to be his student and guiding me to pursue my thesis. His technical insight to the problem, enthusiasm, motivation and infinite patience are some of the things which contribute to do my research work. Whenever I do mistakes technically, he is very patient and kind enough not only in correcting the mistakes but also in encouraging me to come out with more innovative ideas. Apart from these, Dr. R. Srinivasan guided me how to prepare a document, how to approach problems, etc. I thank him for all these.

At this juncture, I take this opportunity to thank my DC members, Dr. Navakanta Bhat and Dr. R. Seshasayanan who gave their valuable suggestions for the improvement of the thesis.

Last but not least, I would like to thank my husband Mr. V. Balasubramanian and daughter B. Madhumitha, without their support, patience and sacrifice this would have been impossible and unimaginable. Finally very special thanks to my mother Mrs. S. Usha who helped me to take care of my household activities often in spite of her busy office work.

LAKSHMI B
