## CONTENTS

Abstract i-iv

Acknowledgements

1. Introduction 1

2. Diffusion of Boron in Silicon 6
   2.1 Introduction 6
   2.2 Nature of Diffusion 7
      2.2.1 Vacancy Diffusion 8
      2.2.2 Interstitial Diffusion 8
      2.2.3 External Interstitial Diffusion 9
   2.3 Simple One-Dimensional Diffusion Theory 9
      2.3.1 Ideal Diffusion Theory 10
      2.3.2 Concentration Dependent Diffusivities 13
         2.3.2.1 Constant Surface Concentration 13
         2.3.2.2 Constant Total Dopant 14
      2.3.3 Temperature Dependence of Diffusivities 15
   2.4 Atomic Diffusion Mechanism 16
   2.5 Evaluation Techniques for Diffused Layers 19
      2.5.1 Junction Depth 20
      2.5.2 Sheet Resistance 20
   2.6 Deviation from Simple One-Dimensional Diffusion Theory 22
      2.6.1 Effect of Oxidation on Impurity Redistribution 22
      2.6.2 Lateral Diffusion Effects 24
      2.6.3 Emitter Push Effect 24
      2.6.4 The Electric field Effect 25
### 3. Modelling of Boron Diffusion in Silicon

4.6.3 The Affinity of Boron Towards Oxide 59
4.6.4 The Surface Diffusion of Impurities over silicon 60
4.7 Silicon Nitride as the Masking Material 61
4.8 Experimental Results 62
4.8.1 Silicon Dioxide Masking 62
4.8.2 Silicon Nitride Masking 62
4.8.3 Silox/Nitride Masking 62
4.8.4 Thermal Oxide/Nitride Masking 64
4.8.5 Thermal Oxide Covered by Nitride 64
4.8.6 Thermal Oxide Partially covered by Nitride 66
4.9 Discussion 66

5. Numerical Solution of Equations Required for Development of Diffusion Models 70
5.1 Explicit Scheme 71
5.2 Implicit Scheme 73

6. Development of Quantitative Models for Diffusion in Silicon Bulk 75
6.1 Anomalies in Boron Diffusion into Silicon 75
6.1.1 N.D. Thai Model 75
6.1.2 Andersons and Gibbons Model 77
6.1.3 S. Motsumuto, Y. Ishikawa Model 78
6.1.4 Kim, Zhu, Kong and Shano Model 81
6.1.5 Gaiseanu Model 82
6.2 Development of Algorithm 82
7. Modelling of Boron Diffusion Through Patterned Silicon

7.1 The Steady State Surface Diffusion Model.

7.2 Time Dependent Surface Diffusion Model
   7.2.1 The values of Different Parameters
   7.2.2 The Discrepancy between \( g_p \) and \( g_m \)
   7.2.3 The window frame width and window width Effects.

7.3 The Increased Value of Flux over the Oxide

7.4 The Results of Numerical Calculations with Modified Program
   7.4.1 The Discrepancy between \( g_p \) and \( g_m \)
   7.4.2 The Window Frame Width Effect
   7.4.3 The Window Width Effect
   7.4.4 The 1 mm Window
   7.4.5 The Results on a Large Sheet
   7.4.6 The Results with Oxide covered by Nitride
   7.4.7 The Results with Oxide Partially covered by Nitride
   7.4.8 The variation of Discrepancy with Time of Diffusion

7.5 Modification of the Preliminary Model

7.6 Development of the Improved Model

7.7 Development of Algorithm

8. Discussions, Conclusions and Suggestions for Future Work

8.1 Diffusion of Boron in plain silicon

8.2 Diffusion of Boron into Silicon with oxide Masking
8.3 The Diffusion of Boron into Silicon with Nitride Masking
8.4 The Surface Diffusion Model
8.5 Suggestions for future work
