LIST OF TABLES

CHAPTER-1

Table 1.1 Some important reports on computing curriculum 9

CHAPTER-2

Table 2.1 Most important engineering and general professional competencies, as rated by Indian engineers and managers working in Indian and multi-national IT companies (2004) 37
Table 2.2 Comparative analysis of some common competencies distinguished and identified by some accreditation agencies 40
Table 2.3 Most important competencies as rated by Indian engineers and managers working in Indian and multi-national software companies (Revised Study 2007) 57
Table 2.4 The most important competencies for software development work related to software services and product development 58
Table 2.5 Taxonomy of core competencies for software developers- ver.1 60

CHAPTER-3

Table 3.1 Core competencies for software developers 77
Table 3.2 Three-tier taxonomy of core competencies for software developers 78

CHAPTER-4

Table 4.1 Most important activities that must be included in the main goals for a new software curriculum 86
Table 4.2 Biglan’s classification of disciplines 102
Table 4.3 Kolb’s learning styles 104
Table 4.4 Perceived importance of communication skills by programmers and systems analysts 109
Table 4.5 Profiles of the respondents for the two polls about communication competence among software developers 110
Table 4.6 Summary of responses for these two polls about communication competence 110
Table 4.7 Competency ladder (Integrating the ladders by Gordon Institute, Dreyfus and Dreyfus, and Denning) 119
Table 4.8 A Comparison of typical academic and real life problems 121
Table 4.9 Some techniques for solving complex ill-defined problems 122
CHAPTER-5

Table 5.1  Some common errors in logical and analytical reasoning  
Table 5.2  Some key aspects of Schön’s perspectives on ‘design’ as ‘reflective action’  
Table 5.3  Principles of Theory of Inventive Problem Solving (TRIZ/TIPS)

CHAPTER-6

Table 6.1  Re-interpreting Perry’s nine stage model of intellectual development as nine stage model of curiosity development  
Table 6.2  Four decision styles proposed by Rowe and Boulgarides  
Table 6.3  Multifaceted definition of engineering systems thinking by Frank and Waks, 2001  
Table 6.4  Levels of systems thinking (derived from Boulding and Sanford)  
Table 6.5  Shifting the focus for systems thinking (Capra’s criteria)  
Table 6.6  Systems thinking approaches by Checkland and Jacobs  
Table 6.7  Senge’s toolbox for cultivating systems thinking  
Table 6.8  Kohlberg’s six stage model of human development  
Table 6.9  Maslow’s Hierarchy of Human Needs

CHAPTER-7

Table 7.1  Importance of teaching methods as rated by Indian engineers and managers working in Indian and multi-national IT companies  
Table 7.2  Perceived effectiveness of pedagogical engagements with respect to enhance of competencies: perceptions of software professionals  
Table 7.3  Effectiveness of educational experiences for competency enhancement of computing students  
Table 7.4  Comparison of Bloom level-specific normalized consolidated ratings  
Table 7.5  Correlation between different consolidated ratings  
Table 7.6  Attribute category-wise consolidated ratings by computing students  
Table 7.7  Correlation matrix between attributes of different lecture formats based on computing students responses  
Table 7.8  Selected catalogue of learning engagements for deep learning from the NSSE study  
Table 7.9  Harden’s taxonomy of curriculum integration  
Table 7.10  Salmon’s levels of collaborative e-learning  
Table 7.11  Dillenbourg’s four conditions for collaborative learning  
Table 7.12  Software professionals’ reflections about advantages of first mentoring experience

CHAPTER-8

Table 8.1  Three-tier taxonomy of core competencies for software developers  
Table 8.2  Five-dimensional ladder of professional and human development
Table 8.3   A novel three-dimensional taxonomy of knowledge domain for software developers
Table 8.4   Perceived effectiveness of pedagogical engagements with respect to enhance of competencies: perceptions of software professionals
Table 8.5   Levels of active engagements (first of four dimensions of our taxonomy of pedagogic engagements)
Table 8.6a  Some selected models for supporting student engagements at Analyze level
Table 8.6b  Some selected models for supporting student engagements at Create and Evaluate levels
Table 8.7   Discipline integration sub-levels based on Biglan’s classification of disciplines
Table 8.8   Levels of integrative engagements (second of four dimensions of our taxonomy of pedagogic engagements)
Table 8.9   Levels of reflective engagements (third of four dimensions of taxonomy of pedagogic engagements)
Table 8.10  Levels of collaborative engagements(last of the four dimensions of taxonomy of pedagogic engagements)

CHAPTER-9

Table 9.1   Benefits of PSP as perceived by Students
Table 9.2   Application of Dillenbourg's principles
Table 9.3   Comparison of pre- and post-workshop consolidated ratings by faculty

APPENDICES

Table A1.1 Importance of twenty-three core engineering and general professional competencies, as rated by Indian engineers and managers working in Indian and multi-national IT companies
Table A1.2 Importance of teaching methods as rated by Indian engineers and managers working in Indian and multi-national IT companies
Table A3.1 Comparison of competencies examined in SPINE-based and revised study
