Preface	i - v
1 General Introduction	01
1.1 An Introduction on "Thin film"	02
1.2 The thin films of semiconductors and their Properties	04
1.2.1 Group II-VI semiconductor compound materials	07
1.2.1.1 Various properties of group II-VI compound Semiconducting materials	07
1.2.2 Various applications of group II-VI Compound semiconducting materials	09
1.3 Aims and objectives of the present work	10
1.4 An impression of materials	11
1.4.1 Cadmium Telluride (CdTe) and its significance	11
1.4.2 A Concise Review of Research Work Carried Out On CdTe	12
References	15
2 Growth of Cadmium Telluride (CdTe) thinfilms By Screen printing technique and elemental analysis	23
2.1 Implication of Deposition Technology for solid films in modern growth progression	24
2.2 Impression of a variety of Thin-Films Deposition Methodologies	25
2.2.1 Evaporation Based Methods	25
2.2.2 Glow- discharge Based Techniques	27
2.2.3 Sputtering Based Processes	28
2.2.3.1 Sputtering By Diode	28

2.2.3.2	Reactive (gas) sputtering method	28
2.2.3.3	Magnetron Sputtering Method	29
2.2.4	Plasma Enhanced methods	29
2.2.4.1	Plasma enhanced polymerization	29
2.2.4.2	Plasma Enhanced Microwave Electron Cyclotron Resonance (ECR) Deposition	30
2.2.5	Chemical Processes under Gas-Phase	30
2.2.5.1	Vapor Phase Epitaxy (VPE) Technique	31
2.2.5.2	Ion Implantation technique	31
2.2.5.3	Thermal Oxidation technique	32
2.2.6	Mechanical Methods	32
2.3	Selection of Screen Printing As Deposition Technique	32
2.3.1	Introduction and General Aspect of Screen printing	32
2.3.2	Traditional Stage sequence Of past deposition Processes Sintering	36
2.4	Formation of Cadmium Telluride (CdTe) Thin Film By Screen printing and Sintering Technique	37
2.4.1	Preparation Of Chemically Synthesize Slurry	37
2.4.2	Screen Printing of Slurry and Sintering	38
2.5	Energy Dispersive Analysis of X-Rays (EDAX)	41
2.6	Results and Discussions	44
2.7	Conclusion	45
	References	46
3	Structural and Morphological Investigations of Screen printed Cadmium Telluride (CdTe) Thin Films	53
3.1	Introduction	54
3.2	Concise discussion of “ X-ray Diffraction”	54
3.1.1	Experimental setup of XRD	59
3.1.2	Results and Discussions	60

3.1.2.1	Lattice Parameters Determination	60
3.1.2.2	Measurements of “Grain Size”, “Micro Strain” And “Dislocation Density” of Sintered films	64
3.2	Transmission Electron Microscopy of screen printed CdTe thin films	67
3.2.1	Introduction on transmission electron microscopy	67
3.2.2	Fundamental operational principle of TEM	68
3.2.3	Operations of TEM	68
3.2.3.1	The fundamental of electron lenses	70
3.2.3.2	Fundamental of diffraction and Image construction by the TEM	70
3.2.3.3	Fundamental of Electron Diffraction in TEM	71
3.2.3.4	The preparation of sample for TEM	73
3.2.4	Results and discussion	73
3.3	Morphological analysis of screen printed CdTe thin films by Atomic Force Microscopy	78
3.3.1	General overview of an Atomic Force Microscopy	78
3.3.2	Various Intermolecular Interactions at Microscopic level	80
3.3.3	Three Type Of Scanning Mode of AFM	83
3.3.3.1	Brief Introduction on Contact Mode of AFM	83
3.3.3.2	Brief Introduction on Tapping Mode AFM	84
3.3.3.3	Brief Introduction on Non Contact Mode of AFM	84
3.3.4	Physical Construction of AFM	84
3.3.5	Background Roughness Parameters and Statistical Estimation With AFM	85
3.3.6	One-Dimensional Surface Roughness Parameters	86
3.3.7	Results and Discussion	88
3.4	Morphological study made by “Scanning Electron Microscopy”	94
3.5	Conclusions	97

	References	98
4	Optical Characterization Of Screen Printed Cadmium Telluride (CdTe) Thin Films	105
4.1	Introduction	106
4.2	Study of optical properties Of thin solid film	106
4.2.1	Optical Absorption	107
4.2.2	Type of Transition in band gap of materials By means of absorption	109
4.2.3	Fundamental of Absorption	109
4.2.4	Types of Transitions	110
4.2.4.1	Direct Allowed	110
4.2.4.2	Direct Forbidden Transitions	113
4.2.4.3	Non-vertical Transition	114
4.3	Experimental procedures	117
4.3.1	Information about UV-VIS-NIR Spectrophotometer	117
4.4	Results and discussions	119
4.4.1	Absorbance of Sintered films	119
4.4.2	Transmittance (T) of Sintered films	121
4.4.3	Reflectance (R) Of Screen printed thin films	123
4.4.4	Absorption coefficient (α)	125
4.4.5	Refractive index(n) of screen printed CdTe thin films	127
4.4.6	Optical conductivity (σ) of screen printed CdTe thin films	129
4.4.7	Extinction coefficient (k) of screen printed CdTe thin films	130
4.4.8	Energy band gap (E_g) of screen printed CdTe thin films	132
4.4.9	Real and imaginary part of dielectric constant of screen printed CdTe thin films	135
4.5	Conclusion made from optical analysis	138
	References	140

5	Dielectrical &Photoelectrical Characterization Of Cadmium Telluride Thin Films	147
5.1	Introduction	148
5.2	Measurement of Dielectric Properties	148
5.2.1	An Experimental setup for measurement of High Temperature L-C-R	149
5.2.2	Experimental Procedure	151
5.2.3	Results and Discussions	152
5.3	Study of Photoelectric properties of Screen printed CdTe thin films	159
5.3.1	Introduction	159
5.3.2	Investigation for Conduction mechanism in thin films	160
5.3.3	Experimental setup to study SCLC mechanism of CdTe thin films	164
5.3.4	Variation of SCLC parameters of screen printed CdTe thin films under the effect of intensity of illumination	166
5.4	Results and Discussions	166
5.5	Photo responsive Resistance	175
5.5.1	Results and Discussions	175
5.6	Conclusions	178
	References	179
6	Application of screen printed cadmium telluride thin-films as photo-detector	186
6.1	An Introduction about Photo detectors	187
6.2	Photoconduction in Semiconducting Materials	187
6.3	Rise and Decay time of photoconductivity	190
6.4	Defects in Semiconductor materials	193

6.4.1	Primary Defects	195
6.4.1.1	Vacancy Defect	196
6.5	Experimental Setup to Detect Photo-response of Sintered CdTe Thin Films	197
6.6	Results and Discussions	199
6.6.1	Photo transient study of Screen printed and sintered CdTe thin films	199
6.6.2	Photoconductive rise and decay time	213
6.7	Conclusions	216
	References	218
7	Inferences and future work	226
	Inference made from research works	227
	Appendix
