ACKNOWLEDGEMENT

I would like to acknowledge my deep sense of gratitude to my both supervisors Prof. Sangeeta Sabharwal and Prof. J. P. Gupta for their valuable guidance, encouragement and help. I would also like to extend my sincere thanks to all the unknown reviewers of reputed International Conferences and Journals where I submitted my work for review. Without their valuable comments and feedback, I would not have improved upon the weaknesses and gaps in my work.

Prof. Sangeeta Sabharwal has always provided me the best guidance. She took all pains like a mother in going through my work again and again. Prof. J.P. Gupta has always been very kind enough to give me a father like support, guidance and encouragement to move on in life, whenever I got depressed with the feedback and comments. He always made me realize that he is always there for my help to show me the right direction. My both supervisors have given me ample opportunity to grow and learn the essential research skills. This thesis would not have been possible without insightful and critical suggestions of my both supervisors and all my reviewers. Both the supervisors have been very supportive throughout this long journey of learning experiences.

I would also like to thank Dr. Yaj Medury, Prof. S.L.Maskara, Prof. Naveen Prakash, Prof. Bhudev Sharma, Prof. Sanjay Goel and Prof. Alka Choubey who always enlightened me by sharing their research experiences to accomplish the quality work. I am also very thankful to Dr Vikas Saxena, Dr. Divakar Yadav, Dr. Hima Bindu, Dr. D.K.Rai, Ms. Santosh Dev, Ms.Santoshi Sen Gupta and Mr. Manas Ranjan Behra who have continuously provided me suggestions for improvement.

I also want to thank my parents for their blessings and continuous support and last but not the least my wife Ria for her unconditional support and giving me all the time at home that I needed for this work from the time I could have spent with her.
