ACKNOWLEDGEMENT

Study of water management issues is increasingly becoming more and more important in the recent time in all the countries. Realizing the importance of the subject, this thesis has been attempted. This is actually the crop of my supervisor Professor Debashis Das of Department of Geography, Visva- Bharati, Santiniketan. Without his useful valuable suggestions from time to time, it was not possible to complete this thesis. So any word of acknowledgement or indebtedness to him from me is appear to be less. He always inspired me not only for academic activities but also in other sphere of my life. I am really blessed and thankful to God that I got the chance to work under his supervision.

I wish to express my deep sense of gratitude to all the teachers of my life, stating from my first day of learning. I am really thankful to all the teachers of Department of Geography, Visva- Bharati, Santiniketan, for her useful suggestions for the thesis.

I acknowledge my gratitude to my family for their constant effort and encouragement. My father (Sri Ghanashyam Ghosh), my husband (Sri Tapan Kumar Ghosh), and my daughter (Ms. Mouli Ghosh) who are the main source of inspirations for anything in my life and I have no hesitation to confess that these three people sacrificed a lot for me.

I am thankful to people of the sample villages.

I also owe my heartily thanks to all the staffs of Mongalkote A.K.M. of High School for their constant encouragement and support.

I am obliged to record my thankful appreciation to all the concerned officials specially to the Chairman and office staffs of Sriniketan-Santiniketan Development Authority (SSDA), all the office staffs of Agriculture Development Office and Block Development Office of Bolpur Sriniketan C.D. Block, Birbhum District, office staffs of irrigation office (Salbagan, Bolpur), Canal Office (Shyambati, Santiniketn), meteorological office of Sriniketan and the staffs of Panchayat Offices of different villages.

I am thankful to Priyabrata Mondal, research scholar of Dept. of Geography for preparing the maps for this thesis and Mithun Chandra for assisting me in computer works.

Limitations of space narrow down the scope for acknowledging my thanks individually to the other concerned institutions and persons who helped me enormously in this research work.

Last but not the least, it is the grace of God for which only I am here today.
