

LIST OF TABLES

1. List of grain amaranth cultivars/genotypes used in the present study.
2. List of intra- and inter-specific crosses made in grain amaranth.
3. Data on somatic chromosomes in 7 cultivars of *A. hypochondriacus* of grain amaranths.
4. Data on somatic chromosomes in 5 genotypes belonging to *A. caudatus*, *A. cruentus* and *A. edulis* species of grain amaranths.
5. Data on chromosome associations at metaphase I, chiasma frequency and pollen fertility (%) in 12 parental genotypes of grain amaranths.
6. Data on chromosome associations at metaphase I, chiasma frequency and pollen fertility (%) in 19 intra- and inter-specific F₁ hybrids of grain amaranths.
7. Data on character means for 11 agronomic traits in parental genotypes of grain amaranth.
8. Data on character means for 11 agronomic traits in 9 intra-specific and 10 inter-specific F₁ hybrids of grain amaranth.
9. Mid-parent (Ha), better parent (Hb) and standard heterosis (Hc) in 9 intra-specific F₁ hybrids in grain amaranths.
10. Mid-parent (Ha), better parent (Hb) and standard heterosis (Hc) in 10 inter-specific F₁ hybrids in grain amaranths.
11. Data on various agronomic traits in parents, F₁ and F₂ generations of the intra-specific (*A. hypochondriacus*) cross Annapurna × PRA 3.
12. Data on various agronomic traits in parents, F₁ and F₂ generations of the intra-specific (*A. hypochondriacus*) cross Annapurna × Sangla A2.
13. Data on various agronomic traits in parents, F₁ and F₂ generations of the intra-specific (*A. hypochondriacus*) cross PRA3 × Sangla A2.
14. Data on various agronomic traits in parents, F₁ and F₂ generations of the intra-specific (*A. hypochondriacus*) cross Sangla A1 × Sangla A2.
15. Data on various agronomic traits in parents, F₁ and F₂ generations of the intra-specific (*A. hypochondriacus*) cross Sangla A1 × Shimla A3.
16. Data on various agronomic traits in parents, F₁ and F₂ generations of the intra-specific (*A. hypochondriacus*) cross Sangla A2 × Shimla A4.
17. Data on various agronomic traits in parents, F₁ and F₂ generations of the intra-specific (*A. hypochondriacus*) cross Shimla A4 × Sangla A2.
18. Data on various agronomic traits in parents, F₁ and F₂ generations of the intra-specific (*A. hypochondriacus*) cross Shimla A3 × Sangla A2.

19. Data on various agronomic traits in parents, F₁ and F₂ generations of the intra-specific (*A. caudatus*) cross ACC-1 × Shimla A2.
20. Data on various agronomic traits in parents, F₁ and F₂ generations of the inter-specific (*A. hypochondriacus* × *A. caudatus*) cross Annapurna × ACC-1.
21. Data on various agronomic traits in parents, F₁ and F₂ hybrids of the inter-specific (*A. hypochondriacus* × *A. caudatus*) cross Annapurna × Shimla A2.
22. Data on various agronomic traits in parents, F₁ and F₂ generations of the inter-specific (*A. hypochondriacus* × *A. caudatus*) cross PRA3 × Shimla A2.
23. Data on various agronomic traits in parents, F₁ and F₂ generations of the inter-specific (*A. hypochondriacus* × *A. edulis*) cross PRA3 × IC-1733.
24. Data on various agronomic traits in parents, F₁ and F₂ generations of the inter-specific (*A. hypochondriacus* × *A. cruentus*) cross Annapurna × PLP-1.
25. Data on various agronomic traits in parents, F₁ and F₂ generations of the inter-specific (*A. hypochondriacus* × *A. cruentus*) cross Shimla A3 × PLP-1.
26. Data on various agronomic traits in parents, F₁ and F₂ generations of the inter-specific (*A. hypochondriacus* × *A. cruentus*) cross Shimla A1 × PLP-1.
27. Data on various agronomic traits in parents, F₁ and F₂ generations of the inter-specific (*A. hypochondriacus* × *A. cruentus*) cross Shimla A4 × PLP-1.
28. Data on various agronomic traits in parents, F₁ and F₂ generations of the inter-specific (*A. hypochondriacus* × *A. cruentus*) cross Shimla A4 × IC-35407.
29. Data on various agronomic traits in parents, F₁ and F₂ generations of the inter-specific (*A. hypochondriacus* × *A. cruentus*) cross PRA3 × IC-35407.
30. Segregation for bract size in F₂ populations of intra- and inter-specific hybrids of grain amaranths.
31. Segregation for inflorescence colour in F₂ populations of 6 intra-specific hybrids in grain amaranths.
32. Segregation for inflorescence colour in F₂ populations of 9 inter-specific hybrids in grain amaranths.
33. Segregation for seed coat colour in F₂ populations of inter- and intra-specific crosses of grain amaranths.
34. Data on agronomic traits of individual selected superior recombinants in F₂.
