

CONTENTS

| | Page No. |
|--|----------|
| List of the tables | i-ii |
| List of the figures | iii-v |
| 1. INTRODUCTION | 1-4 |
| 2. REVIEW OF LITERATURE | 5-16 |
| 2.1 Nomenclature and classification | 5 |
| 2.2 Origin | 6 |
| 2.3 Cytotaxonomical studies | 7 |
| 2.4 Studies on genetic analysis of variation for agronomic traits in hybrids of amaranthus | 11 |
| 2.5 Genetics of plant traits and their inheritance | 14 |
| 3. MATERIALS AND METHODS | 17-22 |
| 3.1 Materials | 17 |
| 3.2 Methods | 17 |
| 3.2.1 Somatic chromosome studies | 17 |
| 3.2.2 Morphological studies | 18 |
| 3.2.3 Hybridization programme | 20 |
| 3.2.4 Meiotic analysis of F ₁ hybrids and parents | 21 |
| 3.2.5 Heterosis studies | 21 |
| 3.2.6 F ₂ segregation and genetic analysis | 22 |
| 3.2.7 Statistical analysis of data | 22 |
| 4. RESULTS | 23-51 |
| 4.1 Somatic chromosome analysis | 23 |
| 4.2 Meiotic chromosome analysis | 27 |
| 4.3 Heterotic effects in F ₁ hybrids | 29 |
| 4.4 Variability in F ₂ | 39 |
| 4.5 Genetic studies | 47 |
| 4.5.1 Inheritance of bract size | 47 |
| 4.5.2 Inheritance of inflorescence colour | 49 |
| 4.5.3 Inheritance of seed coat colour | 49 |
| 4.6 Selection of agronomically superior and high yielding recombinants in F ₂ | 50-51 |

| | | |
|-----|---|-------|
| 5. | DISCUSSION | 52-68 |
| 5.1 | Mitotic studies | 52 |
| 5.2 | Meiotic studies | 53 |
| 5.3 | Heterosis in grain amaranths | 55 |
| 5.4 | Variability | 59 |
| 5.5 | Genetic studies | 61 |
| | 5.5.1 Inheritance of bract size | 61 |
| | 5.5.2 Inheritance of inflorescence colour | 61 |
| | 5.5.3 Inheritance of seed coat colour | 66 |
| 5.6 | Agronomically superior recombinants | 68 |
| 6. | SUMMARY | 69-72 |
| | REFERENCES | 73-78 |
