ACKNOWLEDGEMENTS

I wish to place on record my sincere thanks to Dr. C. Radhakrishna, Professor, Department of Electrical and Electronics Engineering, Jawaharlal Nehru Technological University, Hyderabad for his immense encouragement, constant guidance and suggestions throughout this project work.

I want to give my appreciation to my advisor for his invaluable help in getting me started on this project, his constant generosity in providing the necessary suggestions to do the work, and the many group discussions (which served as motivation), his encouragement and experience. Thanks also to my guide for proof reading the final draft and offering helpful stylistic comments.

My appreciation also goes to my wife Srilalitha for her encouragement.

My deepest appreciation goes to children Leela Pratyusha, Pradyumna and all of my friends who prayed for me so faithfully during the time of the writing of this thesis. My parents have been a constant and invaluable support to me throughout every stage of my education and certainly no less during the writing of this thesis.

Special thanks go to my brother P. Srinivas for extending his help.

The author acknowledges the support and encouragement extended to him by his organization.

P.V. SATYARAMESH
