ACKNOWLEDGEMENT

Acknowledgement of the favours received and privileges enjoyed is not a simple matter of going through a time honoured ritual. It is having the pleasure and satisfaction of discharging various debts of gratitude. Even the best calligraphy can not sufficiently express my gratitude to those, who with such good grace gave a bucketful of strength to me in the completion of the present work.

It was my proud privilege to have been associated with and remain under the constant vigilance of Honorable DR P K DABRAL, M S, Professor and Head, department of Orthopaedics, M.L.B Medical College, Jhansi, throughout the period of my working on this thesis. The joy and experience of working under his guidance is really something out of this world. His invaluable suggestions, constructive criticisms, unfathomed knowledge, meticulous attention to details and never to be matched expertise has been primarily, if not singularly, responsible for the presentation of this work in its present form. He has been a constant source of encouragement and guidance in moments of my despair and it is virtually impossible to express in words my deep sense of indebtedness and profound gratitude to him.

I have no words to express my regards to my inspiring teacher Dr. R P Tripathi, M S, Reader, department of orthopaedics, M.L.B Medical College, Jhansi, without whose help, this work could have never been completed. He had been a constant source of inspiration and encouragement throughout this work. It is because of his constructive criticism and persistent endeavour to get the best from his student, I owe my inexpressible gratitude to him.

I express my gratitude to Dr. D K Gupta, M S, and Dr. Anurag, M S, Assistant Professor in department of orthopaedics for guiding with profound knowledge and practical experience at my disposal. Their timely suggestions, criticism was of unlimited help.

The encouragement, inspirations and sacrifice by my greatmother Smt Omwati Devi, are unforgettable to me throughout my life.

Although friends perhaps do not need these words, but I shall be failing in my duty by not mentioning them. My numerous friends and seniors - Dr. Sanjay Dubey, Dr. Murari Lal, Dr. Narendra Anandani, Dr. A S Verma, Dr. R M Verma, Dr. Harish Arya, Dr. Vijay Kumar, Dr. S S Bist and MR M K Tiwan all helped me at various stages of this work; their help is unaccountable.

I am very thankful to Sister-in-charge orthopaedic O T Mrs. Shyamla Nayar.

I am also thankful to wardboy Ram Saran.

Last but not the least, I am highly obliged to the subjects of this study whose co-operation was essential for the success of this work.

I dedicate my work to love and understanding shared by my mother and brother; which has sustained me throughout.

JHANSI
