ACKNOWLEDGEMENTS

I would like to express my deep gratitude to Prof. G. P. Talwar for taking a special interest in this work. His advice and constant encouragement have been instrumental in shaping this study. His enthusiasm and unlimited capacity for work have been a source of inspiration for me. I consider myself fortunate to have been associated with him.

I would like to take this opportunity to thank my guide Dr. S.N. Upadhyay, for all that he has done for me. I value the freedom he gave me to carry out work, his ready advice and his critical analysis of the data. I have learnt a lot from him.

I acknowledge my Doctoral Committee members Dr. R. Raghupathy, Dr. R. Anand and Dr. S. Gupta for the advice and help provided by them in the course of this work.

The financial help provided by the Institute is also acknowledged.

A special word of thanks to my colleagues in Immunoendocrinology and Embryo Biotechnology labs. Dr. O. Singh and Dr. S.M. Totey have been very generous in giving me free access to their labs whenever the need arose. A word of thanks to Rahul for his suggestions and readiness to provide help. My special thanks to Dr. Totey and Inderjeet in helping me out with the embryo experiments. I would like to take this opportunity to acknowledge Dr. Alexandre Psychoyos, INSERM, France for his suggestions and guidance in designing some of the experiments.

I take great pleasure in getting this opportunity to thank my friends Chandu Bhai, Ashis, Prabhu, Lilly and Tanuka. Their affection, support and encouragement have seen me through thick and thin times, over the years. It has been a pleasure to have Chotu around. I owe her a special thanks for all the help rendered by her in getting this thesis ready. I will always remember Shashi, for introducing me to research and helping me during the initial days at the Institute.
Rekha has proved to be of invaluable help in the course of this work. I have enjoyed working with her. Sunan and Sanjay have proved to be good additions to our group. I have enjoyed their company in the lab. I am thankful to Chandradeep and Mahesh for their enthusiastic help in conducting the experiments.

My acknowledgements would be incomplete without mentioning the cheerful company of my colleagues and batchmates, Alok, Sehsadri, Subhash and Arunachalam. Thanks to Shreemanta for helping out in times of need.

I am really thankful to Mr. Sushil Vasan for helping me to get the thesis in the present format and Rajiv for his help in graphs and charts.

I acknowledge the ready help provided by the people in Library, Stores and Administration. The Dy. Registrar, Mr. Akhilesh Kumar proved to be of help at critical moments. Mr Babulal deserves a special word for doing such a good job in xeroxing the thesis.

Finally a word of gratitude to my family, for their love, affection, support and patience with me. Baji has been my source of inspiration. A special thanks to Atam Chachaji for his continued interest and support in my work.
