LIST OF FIGURES

1. Cellular infectious process - *L. monocytogenes* 29
2. The overall incidence of bacteria isolated 58
3. Species-wise break up of predominant bacterial isolates 60
4. The box plot showing OD_{595nm} of biofilm of *L. grayi* (25 strains) at 4°C, 22°C and 37°C 76
5. The box plot showing OD_{595nm} of biofilm of *L. innocua* (6 strains) at 4°C, 22°C and 37°C 77
6. The box plot showing OD_{595nm} of biofilm of *L. monocytogenes* (2 strains) at 4°C, 22°C and 37°C 78
7. The box plot showing OD_{595nm} of biofilm of *L. grayi* (25 strains) at pH 5.5, 7.5 and 8.5 79
8. The box plot showing OD_{595nm} of biofilm of *L. innocua* (6 strains) at pH 5.5, 7.5 and 8.5 80
9. The box plot showing OD_{595nm} of biofilm of *L. monocytogenes* (2 strains) at pH 5.5, 7.5 and 8.5 81
10. The box plot showing OD_{595nm} of biofilm of *L. grayi* (25 strains) without and with 1% & 5% glucose/sodium chloride supplementation 82
11. The box plot showing OD_{595nm} of biofilm of *L. innocua* (6 strains) without and with 1% & 5% glucose / sodium chloride supplementation 83
12. The box plot showing OD_{595nm} of biofilm of *L. monocytogenes* (2 strains) without and with 1% & 5% glucose / sodium chloride supplementation 84
13. The mean viable count (log CFU/mL) of *Listeria* isolates at pH 4.5, 5, 8.5 & 9.5 after 24hr of incubation

14. The mean viable count (log CFU/mL) of *Listeria* isolates after incubation at 4°C for 1 week – 6 weeks

15. The mean viable count of *Listeria* isolates after 24 hr incubation with varying concentrations of NaCl (5% - 37%)

16. The tolerance of *Listeria* isolates to various heavy metals (mg/mL)

17. Comparison of susceptibility of planktonic and biofilm cells of *L. monocytogenes* towards different disinfectants (mg/mL)

18. Comparison of susceptibility of planktonic and biofilm cells of *L. innocua* towards different disinfectants (mg/mL)

19. Comparison of susceptibility of planktonic and biofilm cells of *L. grayi* towards different disinfectants (mg/mL)

20. Comparison of resistance towards different classes of antibiotics - *E. faecium*

21. Comparison of resistance towards different classes of antibiotics - *K. pneumoniae*

22. Comparison of resistance towards different classes of antibiotics - *P. mirabilis*

23. Comparison of resistance towards different classes of antibiotics - *P. aeruginosa*

24. Comparison of resistance towards different classes of antibiotics - *L. grayi*
