ACKNOWLEDGEMENT

It is pious reverence that I express my profound gratitude to my esteemed teacher Dr. V.P. Mitra, M.D. (Path.), Professor and Head of the Department of Pathology, M.L.B. Medical College, Jhansi, under whose expert and masterly guidance, I had an opportunity to work even at his personal inconvenience. He has been a constant source of encouragement and paternal guidance in my moments of despair. The present study carries at every stage the glittering imprint of his dynamic personality, wise and concrete suggestions, meticulous attention, and nature and reasoned criticism.

I shall ever remain indebted to Dr. Matua, M.D. (Path.), Lecturer in Department of Pathology, M.L.B. Medical College, Jhansi, for her patient guidance and untiring help. Her timely suggestions and critical approach during entire course of study, went a long way in materialising this work in its presentable form. Her affectionate nature and indefatigable spirit were constant beacon of moral support to look at during lean months.

I am equally grateful to Dr. P.K. Jain, M.D., M.H.A.M.C., Lecturer in Medicine, M.L.B. Medical College, Jhansi, for kind and every conceivable help.
to me in carrying out the rather extensive clinical work in Department of Skin and V.D.

Words fail to express my feeling of deep respect to Dr. R.K. Gupta, M.D. (Path.), Reader in Department of Pathology, M.L.B. Medical College, Jhansi, for having freely busk to my profound knowledge and endless resources. Without his co-operation, present study may well not have materialized at all.

I am thankful to Dr. V.K. Sharma, M.D. (Path.), Lecturer in Department of Pathology, M.L.B. Medical College, Jhansi, for his time to time and much solicited help.

I wish to record my gratitude to Dr. U.S. Gupta, Ph.D., Senior Research Officer and Dr. S.K. Shai, Research Officers and others, Central JAMA Institute for Leprosy (CMLI), Agra, who initiated me in the technical expertise necessary for present study and providing the vital antigen.

I extend my thanks to Dr. B.L. Verma, Ph.D., Statistician-exm-Lecturer in Department of S.P.M., M.L.B. Medical College, Jhansi, for help in statistical analysis.

Although friends do not need such words, yet I extend my loving and affectionate thanks to all my friends for their co-operation and help whenever required.
My special thanks to Mr. N.E. Samuel, for bringing out all the work in the presentable form by his excellent ability of preparing the type script.

I shall also be thankful and full appreciation for inconvenience suffered by every patient, his/her relatives, and paramedical staff members especially Mrs. S. Chauhan during the course of present study.

Humility shall be I in this moment of glory and reward for all the credit assured to me, shall actually go to my parents and family members! For without their affection, understanding, suffering, and sacrifice, this study may well not have seen the light of day at all.

( FROM HEMA SINGH )
"Leprosy work is not merely medical relief; it is transforming the frustration in life into the joy of dedication, personal ambition into selfless service. If you can transform the life of a patient or change his values of life you can change the village and country."

"MAHATMA GANDHI"
