4.14 Goodness-of-fit statistics of CFA model- stage 3
4.15 Goodness-of-fit statistics of CFA model- stage 4
4.16 Goodness-of-fit statistics of CFA model- stage 5
4.17 Goodness-of-fit statistics of CFA model- stage 6
4.18 Completely standardized factor loadings, variance extracted and reliability estimates (three-factor CFA model of service quality: stage 6)
4.19 Inter-construct correlations: (CFA model: stage 6)
4.20 AVE, MSV and ASV: (CFA model: stage 6)
4.21 Factor structure of service quality with 21 items post CFA
4.22 Goodness-of-fit statistics of SEM measurement model
4.23 Completely standardized factor loadings, variance extracted and reliability estimates (SEM measurement model)
4.24 Inter-construct correlations: (SEM measurement model)
4.25 AVE, MSV and ASV: (SEM measurement model)
4.26 Fitness indices for structural model with direct effect of service quality on behavioral intentions
4.27 Standardized regression coefficient, critical ratio and p-value for structural model with direct effect of service quality on behavioral intentions
4.28 Standardized regression coefficient, critical ratio and p-value for structural model with indirect effect of service quality on behavioral intentions
4.29 Goodness-of-fit statistics of proposed structural model
4.30 Path estimates of service quality on satisfaction as well as intentions and satisfaction on intentions 168
4.31 Summary of multiple linear regression for service quality dimensions predicting customer satisfaction 171
4.32 Test of homogeneity of variances of service quality in different age groups of retail bank customers 173
4.33 Means and standard deviations of service quality in different age groups of retail bank customers 173
4.34 One-way analysis of variance of service quality by retail bank customer's age 174
4.35 Tukey's multiple comparison test for Pairwise comparison of means of service quality in different age groups of retail bank customers 174
4.36 Means and standard deviations of service quality for male and female retail bank customers 176
4.37 Independent samples t-test for testing difference in means of service quality in male and female retail bank customers 176
4.38 Levene's test of homogeneity of variances of service quality in different income groups of retail bank customers 178
4.39 Mean ranks of service quality in different income groups of retail bank customers 178
4.40 Kruskal-Wallis test for comparing mean ranks of service quality in different income groups of retail bank customers 178
4.41 Dunn's test for Pairwise comparison of mean ranks of service quality in different income groups of retail bank customers 179
4.42 Levene’s test of homogeneity of variances of service quality in different qualification groups of retail bank customers

4.43 Means and standard deviations of service quality in different qualification groups of retail bank customers

4.44 One-way analysis of variance of service quality by retail bank customer’s qualification

4.45 Means and standard deviations of service quality of employed and self-employed retail bank customers

4.46 Independent samples t-test for testing difference in means of service quality in employed and self-employed retail bank customers

4.47 Levene’s test of homogeneity of variances of satisfaction in different age groups of retail bank customers

4.48 Means and standard deviations of satisfaction in different age groups of retail bank customers

4.49 One-way analysis of variance of satisfaction by retail bank customer’s age

4.50 Tukey’s multiple comparison test for Pairwise comparison of means of satisfaction in different age groups of retail bank customers

4.51 Means and standard deviations of satisfaction of male and female retail bank customers

4.52 Independent samples T-test for testing difference between means of satisfaction in male and female retail bank customers

4.53 Levene’s test of homogeneity of variances of
satisfaction in different income groups of retail bank customers

4.54 Means and standard deviations of satisfaction in different income groups of retail bank customers 190

4.55 One-way analysis of variance of satisfaction by retail bank customer's income 190

4.56 Tukey's multiple comparison test for Pairwise comparison of means of satisfaction in different age groups of retail bank customers 191

4.57 Test of homogeneity of variances of satisfaction in different qualification groups of retail bank customers 192

4.58 Means and standard deviations of satisfaction in different qualification groups of retail bank customers 193

4.59 One-way analysis of variance of satisfaction by retail bank customer's qualification 193

4.60 Means and standard deviations of satisfaction in employed and self-employed retail bank customers 194

4.61 Independent samples t-test for testing difference in means of satisfaction in employed and self-employed retail bank customers 195

4.62 Test of homogeneity of variances of behavioral intentions in different age groups of retail bank customers 196

4.63 Means and standard deviations of behavioral intentions in different age groups of retail bank customers 197

4.64 One-way analysis of variance of behavioral intentions 197
intentions by retail bank customer’s age

4.65 Tukey’s multiple comparison test for Pairwise comparison of means of behavioral intentions in different age groups of retail bank customers 198

4.66 Means and standard deviations of behavioral intentions of male and female retail bank customers 199

4.67 Independent samples T- test for testing difference between means of behavioral intentions in male and female retail bank customers 200

4.68 Test of homogeneity of variances in behavioral intentions between different income groups 201

4.69 Mean ranks of behavioral intentions in different age groups 202

4.70 Kruskal-Wallis test for comparing mean ranks of behavioral intentions between different income groups 202

4.71 Dunn’s test for Pairwise comparison of mean ranks of behavioral intentions between different income groups 202

4.72 Test of homogeneity of variances of behavioral intentions in different qualification groups of retail bank customers 203

4.73 Means and standard deviations of behavioral intentions in different qualification groups of retail bank customers 204

4.74 One-way analysis of variance of behavioral intentions by retail bank customer’s qualification 204
4.75 Means and standard deviations of behavioral intentions of employed and self-employed retail bank customers

4.76 Independent samples T-test for testing difference in means of behavioral intentions of employed and self-employed retail bank customers

4.77 Summary of hypotheses tested

4.78 Core products and banks used (% of retail customers)

4.79 Third-party products and banks used (% of retail customers)

4.80 Assets products and banks used (% of retail customers)

4.81 Transaction linked products and banks used (% of retail customers)
