

TABLE OF CONTENTS

PREFACE	1
1 HUMAN STRESS	6
1.1 Introduction	6
1.2 Earlier research on stress	7
1.3 Types of stress	7
1.4 Short and long term stress	9
1.5 Stress is omnipresent	10
1.6 Lazarus model for stress	11
1.7 Stress and Disease	13
1.8 Recovery from short-term stress	15
1.9 Effects of stress	17
2 STRESS AND GONADOTROPIN RELEASING HORMONE (GnRH)	20
2.1 Introduction	20
2.2 Earlier research on stress	20
2.3 Stress as an internal response	21
2.4 Classification of stress	23
2.5 The role of GnRH in reproduction	25
2.6 The role of GnRH Receptors in reproduction	26
2.7 The Mechanism of action of GnRH	27
2.8 The Mechanism of action of GnRH agonists	31
2.9 The Mechanism of action of GnRH antagonists	32
2.10 Structure of GnRH	33
2.11 GnRH Secretion	36
2.12 Pituitary gland	41
2.13 Luteinizing hormone	42

2.14	Follicle stimulating hormone	44
2.15	Control of GNRH secretion	45
2.16	Dysfunction of GnRH	46
2.17	GnRH Function	47
2.18	GnRH treatment in Adolescence	49
2.19	Physiology of GnRH	50
2.20	GnRH effects on Childhood period	51
2.21	GnRH effects on Adult	52
2.22	GnRH Side-Effects	53
2.23	GnRH Treatment in Males	54
2.24	GnRH Treatment in Females	60
2.25	Physiological responses to stress	63
2.26	Effects of stress on reproduction	65
2.27	Sex differences in relation to the effect of stress on reproduction	66
2.28	Role of glucocorticoids in mediating the effects of stress on reproduction	67
3	REVIEW OF LITERATURE	71
4	MATHEMATICAL MODELLING BY USING EXTENDED RELIABILITY GROWTH MODEL FOR SECRETION OF GnRH IN BEEF COWS	83
4.1	Introduction	83
4.2	Parameter interpretation	85
4.3	A Mathematical model for Reliability Analysis of Test- Fix- Test	86
4.4	Application	90
4.5	Conclusion	93

5	MATHEMATICAL MODELLING OF NONPEPTIDE ANTAGONIST TO THE HUMAN GONADOTROPIN RELEASING HORMONE RECEPTOR	95
5.1	Introduction	95
5.2	Parameter interpretation	99
5.3	Mathematical Model	100
5.4	Conclusion	104
6	MATHEMATICAL MODEL OF FOUR SECRETION HORMONES IN HEALTHY MALE SUBJECTS	105
6.1	Introduction	105
6.2	Mathematical model and Assumptions	108
6.3	Existence of steady states of the system	111
6.3.1	Stability	112
6.3.2	Estimation for the length of delay using Laplace transform	115
6.4	Data analysis	122
6.5	Results	123
6.5.1	COR and ACTH secretion	123
6.5.2	GnRH secretion	125
6.5.3	PRL secretion	127
6.6	Discussion	129
7	MATHEMATICAL MODEL ON GnRH ANTAGONISTS TO ENHANCE THE PROSTATE CANCER BEHAVIOR	130
7.1	Introduction	130
7.2	Mathematical model and Assumptions	133
7.3	Application	136
7.4	Results	138
7.5	Conclusion	141

8	COMPARISION OF GnRH ANTAGONIST VERSUS GnRH AGONIST IN MATHEMATICAL MODEL USING RELIABILITY GROWTH MODEL	142
8.1	Introduction	142
8.2	Notation	147
8.3	Mathematical model and Assumptions	148
8.4	Results	153
8.5	Conclusion	154
9	MATHEMATICAL MODELLING ON LAMPREY GnRH-III USING AUTOREGRESSIVE LOGISTIC PROCESSES	155
9.1	Introduction	155
9.2	Mathematical model	156
9.3	Application	161
9.4	Results	164
9.5	The Autoregressive Power Logistic Processes	165
9.6	Conclusion	166
