ACKNOWLEDGEMENTS

The present work was possible due to the encouragement and assistance of a great many people. Amongst those, the guidance, interest and criticism offered by my supervisor Prof. A. Ramesha Rao throughout the years is highly appreciated. I am deeply indebted to Prof. Rao in more ways than one and wish to culminate and practice his ideas in my life and work.

I express my sincere thanks to Prof. M. Habibulla, the former Dean of the School of Life Sciences and to Prof. P.C. Kesavan, the present Dean for providing the necessary experimental facilities.

I also take this opportunity to thank my family - my parents, my grandfather Sardar H.S. Nair, my brother Vikram and sister Harmeet for the understanding, love and support they gave me throughout my life, my dear friends - Perwez, Shehla, Gayatri and Anu who helped me with everything, prodded me on wherever I stopped and suffered innumerable "cups of tea with me"! My labmates Anju and Sarabjit who always stood by me in my good times and bad.

I take great pride in "the group" - Raj Kishore, Deepa, Pinki, Sangeeta, Sandhya, Ashwani, Samapti, Manjula, Maimoona, Anupam, Leena, Chaya, R.K., Ramesh Babu, Gurvinder, Geetanjali, Tarmeet, Inderpreet, Umesh, Ramesh, Surabhi, Mukesh and Rishi - for being what they are and thank them for giving me so much love.

Thanks are also due to Mr. Bishan Chand for his laboratory assistance, Mr. Saji for his excellent typing, Dr. Tyagi and the Animal House Staff for their cooperation, Mr. Alex and Mr. Khan of the C.I.F. for their help in the use of scientific instruments, Inderjeet of the Bioinformatics Centre for his patience and to Mr. Chinmay Nath and Mr. Saini for their artistic skills.

I gratefully acknowledge the financial assistance given to me by the University Grants Commission, India, through Jawaharlal Nehru University.

Saranjit K. Chhabra
