Acknowledgement

With the help of God’ grace, this journey have touched the horizon and come to a successful end. I want to extend my gratitude to the people who supported me during the entire journey. First and foremost, I would like to thank the Almighty, who showered many blessings and help me to achieve the goals.

I owe my deepest gratefulness to my guide Prof. Harish Padh, for his vision, insight and encouragement to complete this piece of work. He has enlightened my path with his knowledge, experiences and given me full moral and emotional support. He has given me lot of inspiration to do hard work and show me the path to take this work at successful and efficacious conclusion. His pertinent guidance, suggestions and constructive criticism are the resilient means which enrich my knowledge, methods of working which further helped in carrying this piece of work.

I would also like to express my sincere gratitude to Dr. Priti Desai for the continuous support of my Ph.D study and related research, for her patience, motivation, and knowledge. Her guidance helped me in all the time of research and writing of this thesis.

I am deeply indebted to my co-guide Dr. Manish Nivsarkar, director of B.V. Patel PERD Centre, Ahmedabad who has recognized my zeal to do Ph.D and gave me opportunity to join the centre. I thank him to provide all the facilities to conduct the research and to make the environment optimum for learning. My sincere thanks to Dr. Neeta Shrivastava, Assistant Director, PERD centre and Dr. Kamala K. Vasu, Dean Student’s Affairs, for their valuable suggestions and constant encouragement.

I thank the Sardar Patel University to allow me to undertake such a project for PhD. I would like to extend my deepest gratitude to Prof. K.C.Patel, Head of Bioscience Department, D.R.C. committee and various faculties of Department of Biosciences, S.P.U. to make me complete my compulsory coursework through classroom teaching and their precious time given to my evaluation. I thank them all for their suggestions during my seminars and presentations.

I would also like to express my gratitude to Muralikrishna Lella and Dr. Radhakrishnan Mahalakshmi, Indian Institute of Science Education and Research, for their help in synthesizing the peptides used in this study.

I would like to thank Dr. Milee Agarwal, Dr. Amita Joshi for their constant support and motivation in the entire journey. I would like to thank administrative and technical staff members of the PERD centre to be kind enough to advise and help in their respective roles.

Helpful and caring seniors are the great part of the life. They create the path of wisdom and learning on which we step in. It is my sincere duty to express my thanks to my seniors Dr. Suhani Almal, Dr. Neeraj Sakhiani, Dr. Anuroopa Gupta, Dr. Sheetal Yadav and Dr.
Poojadevi Sharma for their valuable guidance and suggestions. My special thanks to Shivangi Patel for her help, constant motivation, teaching me molecular biology techniques and to help me in selecting my project.

I thank my fellow labmate and friend Dr. Bhrugu Yagnik, for the stimulating discussions, planning of the project and for working with me as a team. It was due to his support that we could achieve another dimension of the project. I extend my thanks to other labmates, Maitree Dave and Sneha Patel for their help. I would also like to thank my labmates Shivani Yadav and Ashish Bhatt for helping me in some of the animal studies and discussions.

Any time when you stuck somewhere, friends are always there to sail our boat. Life is incomplete without the true friend who always finds the good things in you, even if we fail to do so. I would like to thank my dear friends Anjana Suppahia, Deepak Soner, Anil Prajapati and Shivprasad Moralwar for being nice and helpful during my whole journey. My special thanks to Vipul Jain and Akansha Jain for their unconditional support especially during the last years of my journey. I would also like to extend my gratitude to Shivani Yadav, Varsha Gurbani, and Saket Bansal for helping me in writing Ph. D thesis and supporting me.

Ph. D is a long journey which cannot be completed without the sacrifices the family members have made for me. Blessings of grandparents Dr. B. L. Sharma and Mrs. Shakuntala Sharma, my parents Mr. Anil Kumar Sharma and Mrs. Sunita Sharma as well as my in laws Mr. Somesh Shukla and Mrs. Saroj Shukla have given me strength to reach the end. They have taught me ‘Patience, Perseverance and Pursuance’. They always encouraged me to keep the eyes on the failures and to stand up again. Mothers always have very special place in everybody life. I also acknowledge my uncle Mr. Pramil Sharma and my aunt Mrs. Hemlata Sharma for motivating me. I also acknowledge my younger brother Parantap and my sister Gaurangi, my Sister in law Manisha Shukla and her husband Kaushik Shukla for being resilient and supportive in my entire journey.

The process of Ph. D is not very smooth, it is like walking on the cantankerous path passing through many crust and troughs. It was not possible for me to surf on the waves without the love and support of my life partner Mr. Mayank Shukla. He is such an adorable person who has sacrificed a lot, to make me complete the Ph. D without exhausting. He always walked along with me in every good or bad situation. He wore my depression and stress and soothes me with his love, support and encouragements. Apart from this, he also helped me with some of the Bioinformatics softwares. These words are not enough to express my gratitude towards his love, encouragement and support.

These words are so insufficient to manifest my gratitude and thankfulness. I once again want to thank all who have supported my journey of Ph.D. At the end, I apologize, if I missed someone to be mentioned and acknowledged.

Drashya Sharma
