Acknowledgements

This thesis represents not only my work at the laboratory and keyboard; it is a milestone in more than two decades of work at Surface and Colloid Science Laboratory, Geological Studies Unit (GSU), Indian Statistical Institute (ISI), Kolkata. My experience at Indian Statistical Institute has been nothing short of amazing. Since my first day during Junior Research Fellow on August 6th, 2008, I have felt at home at Indian Statistical Institute. I have been given unique opportunities... and taken advantage of them.

First and foremost I want to thank my supervisor Professor Bidyut K. Paul. It has been an honor to be his Ph.D. student. He has taught me, both consciously and unconsciously, how good experimental chemistry is done. I appreciate all his contributions of time, ideas, and funding to make my Ph.D experience productive and stimulating. The joy and enthusiasm he has for his research, was contagious and motivational for me, even during tough times in persuading of Ph. D. I am also thankful for the excellent example he has provided as a successful chemist and Professor.

Professor S.P. Moulik, Ph.D., D.Sc, FNA, Centre for Surface Science, Professor N. Chattopadhyay, F.A.Sc., Professor S.C. Bhattacharyya, and Professor A. Mahapatra of Department of Chemistry, Jadavpur University, Kolkata have always encouraged me for carrying out my research. Last but not the least, I would like to take this opportunity to convey my gratitude to Professor Kaushik Das, Department of Chemistry, Jadavpur University, Kolkata, for his inspiration, loving support and encouragement during my M.Sc., which motivated me to step forward into research carrier.

Professor S.N. Sarkar, Head, GSU and other faculty members like Professor D. Saha, Professor C. Chakraborty, Professor S. Bandyopadhyay, Professor D.P. Sengupta, Dr. T. Chakraborty, Dr. P. Ghosh, Dr. S. Patranabis Deb of GSU, and Dr. Sajal Das of North Bengal University are always helpful for their constant support and for various academic discussions.

The Director and the Dean of Studies of Indian Statistical Institute, Kolkata are acknowledged for providing me with a Research Fellowship (both Junior and Senior), other infrastructural facilities and also giving me the opportunity to share my research experience with researchers in various parts of country as well as in abroad through participation in national and international conferences.
I thank Professor Swapan K. Saha of Department of Chemistry, North Bengal University (NBU), Darjeeling and Professor K.P. Das, Department of Chemistry, Bose Institute (BI), Kolkata for extending their help to work with the Fourier transform infrared (FTIR) spectroscopy and Dynamic Light Scattering (DLS), respectively.

I would like to also thank my fellow researchers of GSU for all of the wonderful experiences we shared. I thank Mr. Shuvabrata De (GSU) and Mr. Victor Banerjee (BI) for all of their assistance in various forms with progress of my research activities. I could never repay them for all of their help and encouragement. My special thanks to Mr. Soumik Bardhan, Senior Research Fellow, Department of Chemistry, NBU for various discussions relating to science or otherwise and also for his support when things were at low ebb. I must mention administrative staffs of GSU and Dean’s office who were always keen to cooperate with me.

My time at Research Scholar Hostel (ISI) was made enjoyable in large part due to the many friends and groups that became a part of my life. I am grateful for time spent with hostel mates and friends, for my backpacking buddies and our memorable trips into the seas, as I finished up my degree and for many other people and memories. I am very much indebted to my brothers, Soumya, Chiranjiv, Palash and sisters, Sweta, Swastika, Rituparna, Ankita who were always been with me in the days of my disappointments. They made my life worth living. I would express my thanks to Manchester United team and players and specially, Cristiano Ronaldo for providing me the inspiration and weekend joy in making this tough task an easier one.

Finally, and most importantly, many thanks to my family - my father, Karunamoy Kundu; my mother, Reba Kundu; and my elder sister, Mrs. Shrabani Halder - for all their love, support and the freedom they accorded me to pursue my dream. And most of all for my loving, supportive, encouraging, and patient girlfriend, Ms. Ankita Aich whose faithful support during the final stage of this Ph.D. is so appreciated. Thank you. To them I dedicate this thesis.

Kaushik Kundu

Indian Statistical Institute, Kolkata
