Acknowledgements

First and foremost, I would like to thank Almighty for giving me the knowledge, ability, strength and opportunity to undertake the presented research study and to complete it satisfactorily. This achievement would not have been possible without His blessings.

With immense reverence, I express my sincere gratitude to my research supervisors, Prof. Vanita Verma and Dr. Kalpana Dahiya for giving me the opportunity to undergo the presented research work under their able guidance. This work is an outcome of their invaluable and unflagging support, immense knowledge, patient guidance, constructive criticism, persistent encouragement and affection. I greatly appreciate the freedom they have given to me and nurturing in me a desire to know more. I consider myself fortunate to have had the opportunity to work with them. I shall, forever, be obliged for their guidance, love and care.

I wish to convey my profound sense of gratitude to Dr. Anuj Sharma, Assistant Professor, Department of Computer Science and Applications, Panjab University, Chandigarh, for his keen interest in my work, unwavering support and the stimulating discussions that helped in bringing this work in presentable form.

I am highly obliged to Prof. Gurmeet Kaur, Chairperson, Department of Mathematics, Panjab University, Chandigarh and Prof. S.K. Tomar and Prof. Savita Bhatnagar, former chairpersons, for providing me the necessary facilities during the course of my research work.

Finally, I deeply acknowledge the people who mean the world to me, my parents who showed faith in me and gave me liberty to choose what I wished for. I salute them for their selfless love, affection and for the sacrifices they did to shape my life.
Further, I express my thanks to my sisters and brother for their immense love, care and moral support.

My heart felt regards goes to my mother in law for her co-operation and unconditional support.

I owe much to a very special person, Gurjinder Singh, my husband, for his continued support, understanding and unfailing love during the pursuit of my research that made the completion of thesis possible. I deeply value his contribution and greatly appreciate his belief in me.

Above all, I deeply appreciate the contribution made by my kids Noor and Avi in their own innocent way, by abiding my ignorance and showing the patience during my thesis writing.

One of the greatest joys of this work is that it gave me an opportunity to make some truly wonderful friends who provided a very pleasant working environment and helped me in little bit of everything. My friend Mona Narang deserves a special thanks for her frequent help and being always there for me through every thick and thin. Also, I would like to thank Ekta Jain for her co-operation and support. There are too many to be listed here but that does not belittle their significance in any way.

I would be failing in my duty if I do not thank Prof. Renu Vig, Former Director, UIET, Panjab University Chandigarh, and my colleagues of Department of Applied Sciences, for their help at many stages of my work and for providing me the convenient environment for pursuing my research work.

I would also like to express my gratitude to Dr. Saurabh Bhatia and Dr. Munish Kansal for their kind co-operation and collegial guidance.
Lastly, I again thank God for giving me the patience and strength to work through all these years so that today I can stand proud with my head held high.
