Acknowledgement

First of all, I owe my deepest gratitude to my thesis supervisor Prof. Avinash Chandra Pandey. His wonderful guidance and unwavering support and most importantly his constant encouragement allowed me to complete this work. His excellent ideas, diverse knowledge about the topic and his suggestions helped me throughout the thesis.

I would also like to appreciate Prof. A. K. Mittal for his valuable and perceptive suggestions. His encouragement, guidance, and support from the initial to the final stage enabled me to develop an understanding of the subject and I was able to apply the ideas of chaos and nonlinear dynamics for predictability studies in meteorology.

I would also like to thank Dr. Suneet Dwivedi for his constant inspiration and encouragement, throughout the investigation and preparation of this thesis. His guidance and support made this thesis possible. I am thankful to Dr. Shailendra Rai and Mr. Krishna Chandra Tripathi for his support, especially in the initial stages of my research work. He has been supportive throughout this work.

With great respect, I would also like to thank Prof. J. Shukla for inviting me to attend an extensive training program at Centre for Ocean – Land – Atmosphere Studies (COLA), Calverton, Maryland, USA spanning over two semesters and also four times to International Centre for Theoretical Physics (ICTP), Trieste, Italy, which enabled me to learn the fundamentals of Atmospheric and Ocean Sciences.

I would also like to thank my friends, batch mates and colleagues with whom I have worked with over the years – Dr. Vivek Kumar Pandey, Dr. Anshu Prakash Mishra, Mr. Amitabh Mitra, Mr. Rajesh Kumar, Mr. Krishna Chandra Srivastava, Sandipan Mukherjee, Manish Joshi, Dr. Sudhir Kumar Singh, Archna, Arti and Ram Pratap Yadav.

I pay my sincere thanks to excellent research and office staff of M. N. Saha Centre of Space Studies and K. Banerjee Centre of Atmospheric and Ocean Studies.

I would also like to appreciate Dr. Emilia Jin for his valuable and perceptive suggestions and constant encouragement during my COLA, USA trip.

There are several people that deserve special thanks for helping me complete this thesis and whom I owe a lot. I would like to sincerely thank my all teachers and colleagues in the Department of Physics for being generous, cooperative, and supportive. I would also like to thank Prof I. M. L. Das and Mr. Sandipan Mukherjee who are co-authors in some of the papers.

I am also grateful to the funding agency viz. National Centre for Antarctic and Ocean Research (NCAOR), MoES, which provided the necessary support to carry out this research work.

Finally, I would like to thank my parents whose blessings accompanied me throughout this journey. I would like to thank them for their love, patience, and continuous support. The unconditional love of uncle, aunt, brother, sister, brother-in-law has accompanied me throughout this journey. I owe this thesis to them;

I would sincerely like to thank everyone again who have helped me in completion of my work.

(Ravi Prakash Shukla)
