Acknowledgement

All praise be to Allah, The lord of creations, The Merciful, The Compassionate, The Ruler of the day of judgment, The Sovereign of sovereigns, The most Beneficent and Benevolent, who guided me in the right direction and showered me indefinite blessings of strength, courage and confidence to bring out this uphill task.

It is a great privilege for me to express my profound sense of gratitude and indebtedness to my supervisor and the Chairman, Department of Biochemistry, Prof. Najmul Islam for his unending support, constant encouragement, esteemed supervision, constructive criticism and stimulating discussion during the course of my research work. As the chairman, he made available the necessary infrastructure and resources to accomplish my research work. He has been very solicitous all through these years and made himself available whenever approached, despite his very busy academic schedule. His timely and efficient contribution helped me shape this thesis into its final form and I express my sincere appreciation for his assistance in any way that I may have asked. I would also like to express my sincere thanks to all other faculty members for their cooperation when needed.

My sincere thanks to Dr. Mazhar Abbas, Department of Orthopaedics, for giving me permission to collect sera of osteoporotic patients, who were undergoing treatment in J.N.M.C., A.M.U., Aligarh.

I offer my deep appreciation to my senior research colleague, Dr. Irfan Ahmad Ansari for his cooperation and help during the course of my research work. He made me acquainted with the handling of instruments and fine practical knowledge. The guidance and support received from him was vital for the success of this thesis. I would also like to thank my lab colleagues, Dr. Abhishek, Wasil and my senior Dr. Kiran Dixit for their invaluable cooperation. I treasure my friendship with all my friends especially, Saman Ahmad, Nida Zaidi, Sana Alam, Shazia Aman for their help and kind co-operation during the course of research.
work. I would also like to extend warm thanks to my juniors Azhar, Parvez, Abdul Rouf, Yasir, Reena, Yusra and Shazia for their humorous and friendly sarcasm, which lightened my tension during difficult phases of this work.

I owe a deep sense of gratitude to my dear friend Farzana, for her constant moral support and encouragement. She was the guiding candle through all the dark and difficult moments of my study. I gained a lot from her, through our personal and scholarly interactions, her thoughtful suggestions at various points of my research programme, shall always be cherished.

My fondest gratitude lies towards my parents for nurturing and moulding me to what I am today. Their constant encouragement and profound love has been the only important source of confidence in me. No words I write here, shall ever do justice to the endless prayers, my mother has made for me. My father has always been a source of inspiration for me and has been one of my best counselors. I doubt that I will ever be able to convey my appreciation fully, but I owe my eternal gratitude to him. I deeply cherish the wonderful care of my sister, Sania and brother, Salman for their encouragement and appreciation. Finally, an honorable mention to my parents in law for the unwavering faith in me, without which I would have never achieved my goal.

And to my husband, Shah Mohammad Aamir, I would be failing in my duty, were I not to mention his very kind assistance and paramount support at every milestone I cross in my life with him. There can be no words; I can thank him for his heartwarming cooperation and wonderful company which became a refreshing oasis for me under all odds and evens of my work.

SABA AHMAD
