ACKNOWLEDGEMENT

Completion of my doctoral thesis was possible with the support of several people. I would like to express my sincere gratitude to all of them. First, I would like to express my sincere gratitude for the time, encouragement, and guidance provided by my supervisor, (Late) Prof. Padam Kumar and whose help cannot be truly expressed in words. Indeed the technical insight and intuition have helped me in exploring in the area of machine translation system. I also would like to thank him for the guidance, valuable advice, motivation, enthusiasm, and immense knowledge that has greatly improved my dedication to carry on with research activities.

I would also like to thank Prof. S.C. Saxena, (Late) Prof. Padam Kumar, Prof. Sanjay Goel, and Prof. Vikas Saxena, Dr. Sandeep Kumar Singh and Prof. Alka Tripathi for serving on my final Ph.D committee and for all of their support and suggestions. Few faculty members of the JIIT, Noida have been very kind enough to extend their help at various phases of this research work, whenever I approached them, and I do hereby acknowledge to them. I would like to thank Prof. Bhu Dev Sharma, for the suggestion provided to me in sense based machine translation. I would like to thank Dr. Hema N, CSE Department for the support provided in writing. I would like to thank Prof. Hima Bindu Maringanti (ex-supervisor), Dr. Divakar Yadav (ex-supervisor) and Dr. Yamuna Prasad (ex-supervisor) for the constant support in reviewing, writing and suggestion provided in my research work.

I would also like to thank entire JIIT family members with whom I made during the past seven years on my path toward earning my doctoral degree. Thanks for all the great times and all the encouragement and suggestions. It made this journey much more pleasant and meaningful.

I owe a lot to my dear parents, who encouraged and helped me at every stage of my personal and academic life, and longed to see this achievement come true. My father, Prof K Kumar, being an active researcher in corrosion materials by profession, has developed the cement polymer composite coating (CPCC) and still working on various research works. I should thank him for being a motivation factor for this research work. He has been my advisor and great support from his field experiences.
Special thanks to my dear family. Simple words cannot express how grateful I am to my daughter Harshitha (3 years) for all the sacrifices that she had made on behalf of me, by waiting patiently for completion of my seven-year research work. Your love and prayer for me were what sustained me thus far. I would like to thank my mother, C. Vijayalakshmi, for providing me the support during hard times and also for praying on behalf of me for my research work. At the end I would like to express appreciation to my beloved wife G. Viduthalai Selvi who spent more time in handling my daughter to provide me the valueable time for my PhD and was always my support in the moments when there was no one to answer my queries.

Above all, I owe it all to the almighty God for granting me the wisdom, health and strength to undertake this research task and enabling me to its completion.

Thank you all.
