Table #  Title  Page #

CHAPTER-I

Table-1. Composition of mature fenugreek seeds  16

CHAPTER-II, Section-A

Table-1. Influence of dietary fenugreek seeds and onion on fasting plasma insulin and insulin sensitivity indices in diabetic rats.  29
Table-2. Influence of dietary fenugreek seeds and onion on plasma urea, creatinine, and glycosylated haemoglobin levels in diabetic rats.  31
Table-3. Influence of dietary fenugreek seeds and onion on plasma proteins in diabetic rats.  31
Table-4. Influence of dietary fenugreek seeds and onion on changes in histomorphometry of pancreas of diabetic rats (Hematoxylin and eosin staining).  38

CHAPTER-II, Section-B

Table-5. Influence of dietary fenugreek seeds, onion and their combination on plasma antioxidant status.  55
Table-6. Influence of dietary fenugreek seeds, onion and their combination on liver antioxidant status.  56
Table-7. Influence of dietary fenugreek seeds, onion and their combination on plasma lipid profile.  57
Table-8. Influence of dietary fenugreek seeds, onion and their combination on liver lipid profile.  59

CHAPTER-III, Section-A

Table-1. Sequences of the primers used for this study.  74
Table-2. Effect of dietary fenugreek seeds and onion on heart lipid profile.  76
Table-3. Effect of dietary fenugreek seeds and onion on cardiac fatty acid composition (%).  77
Table-4. Effect of dietary fenugreek seeds and onion on heart antioxidant status.  85
Table-5. Effect of dietary fenugreek seeds and onion on circulatory marker enzymes in diabetic rats.  88
Table-6. Effect of dietary fenugreek seeds and onion on cardiac marker enzymes in diabetic rats.  89
CHAPTER-III, Section-B

Table-7. Effect of dietary fenugreek seeds, onion and their combination on erythrocyte indices in diabetic rats.

Table-9. Effect of dietary fenugreek seeds, onion and their combination on erythrocytes antioxidant status in diabetic rats.

Table-10. Effect of dietary fenugreek seeds, onion and their combination on erythrocyte membrane lipid profile.

Table-11. Effect of dietary fenugreek seeds, onion and their combination on erythrocyte membrane fatty acid composition (%).

Table-12. Effect of dietary fenugreek seeds, onion and their combination on erythrocyte membrane-bound ATPases in diabetic rats.

CHAPTER-IV, Section-A

Table-1. Sequences of the primers used in this study.

Table-2. Influence of dietary fenugreek and onion on renal antioxidant status in diabetic rats.

Table-3. Influence of dietary fenugreek and onion on renal lipid profile in diabetic rats.

Table-4. Influence of dietary fenugreek and onion on renal fatty acid composition in diabetic rats (%).

Table-5. Influence of dietary fenugreek and onion on renal mitochondrial DNA and urinary excretion of 8-hydroxy 2-deoxyguanosine.

CHAPTER-IV, Section-B

Table-6. Sequences of the primers used in this study.

Table-8. Influence of dietary fenugreek seeds, onion and fenugreek+onion on renal aminotransferases and phosphatases in diabetic rats.

Table-9. Influence of dietary fenugreek seeds, onion and fenugreek+onion on renal ATPase activities in diabetic rats.

Table-10. Influence of dietary fenugreek seeds, onion and fenugreek+onion on renal membrane fluidity.
List of Tables

Table-11. Leaching of renal tubular enzymes (proximal region) in diabetic rats maintained on dietary fenugreek seeds and onion. 169

Table-12. Leaching of renal tubular enzymes (distal region) in diabetic rats maintained on dietary fenugreek seeds and onion. 169

Table-13. Influence of dietary fenugreek seeds, onion and fenugreek+onion on polyol pathway enzymes and metabolites in diabetic rats. 170

CHAPTER-V

Table-1. Sequences of the primers used in this study. 192

Table-2. Effect of dietary fenugreek seeds and onion on lens weight and lens protein content in diabetic rats. 194

Table-3. Effect of dietary fenugreek seeds and onion on the distribution of crystallins in soluble protein fractions of eye lens of diabetic rats. 196

Table-4. Effect of dietary fenugreek seeds and onion on lens antioxidant status in diabetic rats. 200

Table-5. Effect of dietary fenugreek seeds and onion on the activity of lens polyol pathway enzymes and metabolites in diabetic rats. 202

Table-6. Effect of dietary fenugreek seeds and onion on the activity of lens carbohydrate metabolising enzymes in diabetic rats. 204
